

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Jordan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — and congrats on finishing primary school! That's a big step. Since you're 16 and have completed primary school in Denmark (likely 9th or 10th grade), you're now at a key decision point. Your next step depends a lot on your **interests**, **strengths**, and **future goals**.

Here's a breakdown of your **main options in Denmark** after primary school, and how you might choose between them:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university and include:

a. STX (Studentereksamen)

- Broad, academic focus — good for university.
- Subjects: Danish, history, math, science, languages, etc.
- Good if you're unsure what you want but might want to go to university later.

b. HHX (Higher Commercial Examination Programme)

- Focus: business, economics, marketing, and languages.
- Good if you're interested in starting a business, finance, or international trade.

c. HTX (Higher Technical Examination Programme)

- Focus: science, technology, IT, and engineering.
- Ideal if you're into STEM (science, tech, engineering, math).

d. HF (Higher Preparatory Examination)

- 2 years (vs. 3 years for the others).
- More practical/theoretical mix, often used by people who decide a bit later to pursue higher education.
- Good if you want a shorter path and maybe aren't sure what you want yet.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Practical training to become e.g. an electrician, carpenter, mechanic, hairdresser, chef, etc.

- Combines school and apprenticeship (praktikplads).
- Usually 3–5 years depending on the profession.
- Good if you want to work with your hands, earn money during education, and don't necessarily plan on university.

You can also take the **EUX**, which mixes vocational training with general academic subjects — so you can both work and go to university later.

Your background (Jordanian roots & Danish fluency)

This can actually be a strength! For example:

- **Languages:** If you speak Arabic too, that's a huge asset in jobs that value multiculturalism (e.g. business, social work, international relations, translation).
- **Bridge-builder:** You can understand both Danish and Middle Eastern cultures — useful in fields like healthcare, teaching, diplomacy, or community work.

How to decide?

Here are some questions you might ask yourself:

- Do I want to go to **university** one day? → Choose STX, HHX, HTX, or HF.
- Do I enjoy **practical work** or want to start working sooner? → Choose EUD or EUX.
- Am I interested in **business, technology, science, social studies, or arts**?
- Do I learn better through **books and theory**, or **hands-on work**?

Example paths based on interests

Interest	Suggested Path
Science/Engineering	HTX or EUX Tech
Business/Economy	HHX or EUD Business
Helping people/Social work	STX or HF, then university (e.g. social educator)
Creative work (media, design, etc.)	STX (with arts), EUD (graphics/media), or EUX Creative
Quick entry to job market	EUD or EUX
Unsure but want to keep doors open	STX or HF

Final tips:

- Talk to your school's **UU-vejleder (youth guidance counselor)** — they can guide you and help you apply.
- Visit **open house events** at schools in your area.
- Consider a **brobygning** or **praktik** to try a field for a week or two.

- Ask yourself: *Where do I see myself in 5–10 years?*
-

If you want, I can help you narrow it down more if you tell me:

- What subjects you enjoy most
- What you're good at
- What kind of work or lifestyle you imagine for your future

Let me know and I'll tailor the advice more for you.
