

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kazakhstan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark (which usually ends after 9th or 10th grade), you're at a key decision point. Your next steps will shape both your education and career options, but don't worry—there are several good paths depending on your interests, strengths, and goals.

First, a few questions to consider for yourself:

- Do you enjoy academic work or more practical, hands-on activities?
- Do you have a specific career or field you're curious about?
- Are you open to studying at a university in the future?

Now, here are the **main educational paths** available in Denmark after primary school:

1. Gymnasium (STX, HTX, or HHX) – Academic Upper Secondary Education

If you're academically inclined and might want to go to **university** later, this is a strong option.

- **STX (Almen studentereksamen)** – Broad academic focus: Danish, history, languages, science, etc.
- **HTX (Teknisk studentereksamen)** – Science & technology-oriented. Great if you're into engineering, biology, IT, etc.
- **HHX (Handelsstudentereksamen)** – Focus on business, economics, and international trade.

 *Recommended if:* You like studying theory and want broad university options later.

2. EUD (Erhvervsuddannelse) – Vocational Education and Training

If you're more hands-on and want to **start working sooner** or become a skilled worker (e.g., carpenter, electrician, chef, hairdresser).

- You learn both in school and in a real company through an apprenticeship.
- Some EUD programs even let you continue to university-level studies later.

 *Recommended if:* You enjoy practical work and want to start a career earlier, possibly with less debt.

3. EUX – Combination of Vocational + Academic

This is a hybrid path: you get a **vocational education AND a studentereksamen** at the same time.

- You get a skilled trade plus the right to go to university.
- It's more demanding but very flexible long-term.

📌 *Recommended if:* You want both career-readiness and the option to study further.

🕒 How to Choose?

If you like...	Consider...
Languages, history, literature	STX
Science, technology, math	HTX or EUX Tech
Business, marketing, economics	HHX or EUX Business
Working with your hands, being active	EUD
A backup plan with flexibility	EUX

Final Thoughts for You:

Since you're fluent in Danish and have finished primary school in Denmark, you have the same opportunities as everyone else. But your Kazakh background could also be a **strength**, especially in global business, translation, international studies, or tech—fields where multiple languages and cultural awareness are valuable.

If you're unsure, **visit open house events** at local gymnasiums and vocational schools. You can also talk to a **UU-vejleder (youth guidance counselor)** for personalized advice.

Would you like me to help you explore schools or programs near where you live in Denmark?
