

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kenya. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a big and exciting decision—well done for thinking ahead! Since you're 16, fluent in Danish, and just finished primary school (which usually means **9th grade** in Denmark), you're now at a common point where students choose between different educational paths. Your choice depends on your **interests, strengths, and long-term goals**. Here's a breakdown of the main paths available in Denmark, with some advice tailored to your background:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university. Ideal if you're interested in subjects like science, languages, social studies, or economics.

Options:

- **STX (Almen studentereksamen):** Broad and academic. Good for most university degrees.
- **HHX (Højere handelseksamen):** Focus on business and economics.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen):** Shorter (2 years), more flexible—often for students who want a quicker route to certain professions.

Recommended if:

- You enjoy academic subjects and might want to go to university.
- You're still exploring what interests you long-term.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This path mixes school with hands-on work experience. You'll train for a specific job—could be anything from a mechanic to a hairdresser, IT specialist, carpenter, etc.

Recommended if:

- You prefer practical learning over sitting in a classroom.
- You already have an idea of a trade or profession you like.

💡 How to Decide?

Here are a few questions to reflect on:

- Do you enjoy academic learning (reading, writing, exams)?
 - Are there subjects you're especially good at or passionate about?
 - Do you like working with your hands or creating things?
 - Are you interested in a specific career already?
-

Some Personal Tips for You

Given your background (Danish-born with Kenyan roots), you might also have special skills in cultural awareness or multilingual communication. These could be valuable in fields like:

- **International business or politics** (HHX → University)
 - **Healthcare or social work** (HF or STX → University College)
 - **Technology/engineering** (HTX or EUD → Engineering school)
 - **Creative industries** like media, design, or music (STX or relevant EUD programs)
-

Want Help Choosing a Specific School?

If you'd like, I can help you look up **local schools or programs near where you live in Denmark**. Just tell me your city or region.

Would you like help figuring out what you're interested in? I can also give you a few short quizzes or examples to find a good fit.
