

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kiribati. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—it's great you're thinking seriously about your future so early. Since you've just finished **primary school in Denmark** (which ends at **9th or 10th grade**, depending on your path), you're at a key transition point. In Denmark, there are several strong and flexible options depending on your interests, skills, and long-term goals.

Here are the **main educational paths** you can consider after primary school, along with suggestions depending on what you're interested in:

♦ 1. Gymnasium (STX, HHX, HTX, HF)

These are academically focused and prepare you for university.

▪ STX (Almen studentereksamen):

- Broad academic education (humanities, science, social studies).
- Good if you like a general education and want to keep your options open.

▪ HHX (Handelshøjskolens studentereksamen):

- Focus on business, economics, marketing.
- Great if you're interested in business or entrepreneurship.

▪ HTX (Teknisk studentereksamen):

- Focus on science, technology, and IT.
- Good choice if you enjoy math, engineering, or science.

▪ HF (Højere Forberedelseseksamen):

- Shorter (2 years), more practical and flexible.
- A good path if you want a slightly less academic and faster route to higher education.

♦ 2. EUD / EUX – Vocational Education and Training

If you want to **learn a trade and get a job faster**, this is a great path.

▪ EUD:

- Direct vocational education (e.g., carpenter, electrician, chef, hairdresser).

- You'll combine school with internships (praktikplads).
- Great if you like working with your hands or want to enter the workforce earlier.

▪ EUX:

- A mix of vocational training and gymnasium-level academics.
- Gives you **both a trade and access to university**.
- Good if you're unsure whether to work or study later.

♦ 3. International options (IB or similar)

- If you're considering studying or working internationally, you could look into International Baccalaureate (IB).
- Taught in English and accepted worldwide.
- Demanding, but great for global opportunities.

✅ What path might fit you?

Here are some **questions to think about** that can help narrow things down:

- Do you enjoy **academic school subjects**, or do you prefer **more practical/hands-on work**?
- Are you interested in a specific **career** (like business, tech, healthcare, trades)?
- Would you like to go to **university one day**, or would you prefer to **start working earlier**?

👣 Suggested Next Steps

1. **Talk to an educational advisor (UU-vejleder)** – Every municipality in Denmark has one for young people.
2. **Visit "UddannelsesGuiden"** (www.ug.dk) – It has information on all education types in Denmark.
3. **Attend open house events** at local gymnasiums or vocational schools.
4. **Consider your strengths and passions** – this will guide you far.

If you'd like, I can help you narrow it down even more if you tell me:

- What school subjects you enjoy the most
- Whether you prefer practical or academic work
- If you have a dream job or interest area (like business, tech, art, etc.)

Let me know and I'll give you a more personal recommendation!
