

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kuwait. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — you're in an important and exciting moment of your life. Since you've just finished primary school (called "folkeskole" in Denmark), your next step is typically one of the following educational paths, depending on your interests, strengths, and long-term goals.

1. Gymnasiale uddannelser (General Upper Secondary Education)

This path prepares you for university. It's a good choice if you're academically inclined and interested in a broad education.

- **STX (Studentereksamen):** Focus on general academic subjects like languages, science, and humanities.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and international relations.
- **HTX (Højere Teknisk Eksamen):** Focus on science, technology, and engineering.
- **HF (Højere Forberedelseksamen):** A shorter (2-year) option, more practical and flexible, good if you want to go to university but don't want a full 3-year gymnasium.

✓ Good for you if:

You like academic subjects, want to go to university, or aren't yet sure what career to choose.

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

This prepares you for a specific job (like carpenter, electrician, hairdresser, chef, etc.). You learn part-time in school and part-time in a real job as an apprentice.

✓ Good for you if:

You prefer practical, hands-on work and want to start earning earlier.

 *Tip:* You can also take an EUX, which combines vocational training with a general upper secondary education — useful if you want to keep the door open to university later.

3. International or Bilingual Pathways

Given your Kuwaiti background and fluency in Danish, you might also consider international options such as:

- International Baccalaureate (IB) – taught in English, internationally recognized.
- Some private schools offer bilingual or international programs.

✓ Good for you if:

You're interested in an international career, moving abroad someday, or using your multilingual

background.

How to Choose?

Ask yourself:

- Do I enjoy studying academic subjects (like math, science, languages)?
- Do I prefer learning by doing (e.g. practical work)?
- Do I want to go to university?
- Am I already interested in a specific job or area?

Also, visit education expos, talk to your school counselor, and check out **uddannelsesguiden.dk** (UG.dk) — the official Danish education portal.

Suggestion

Based on your fluency in Danish and your multicultural background, here's a potential roadmap:

- If you're academically interested: **STX or HHX** — STX is broader, HHX is more focused on business and could be great if you're interested in international business or economics.
- If you're hands-on or want to work sooner: **EUX** — you get both a trade and the possibility to study further later.
- If you're internationally minded: **IB program** — opens up global opportunities.

Would you like help choosing between specific programs, or want to talk about your interests and strengths to narrow it down?
