

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kyrgyzstan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — and congrats on finishing primary school! That's a big milestone. Since you're in Denmark, just finished *folkeskolen*, and are fluent in Danish, you have several good paths ahead of you depending on your interests, strengths, and future goals.

Main Education Paths After Primary School in Denmark

Here are the most common options:

1. Gymnasium (General Upper Secondary Education – STX, HHX, HTX, HF)

Ideal if: You like academic subjects, might want to go to university later.

- **STX (Studentereksamen)** – Focus on humanities, science, and social studies. Broadest and most flexible.
- **HHX** – Business-oriented (economics, marketing, international trade). Great if you're into commerce or entrepreneurship.
- **HTX** – Tech and science focused (engineering, IT, biology, chemistry).
- **HF** – Shorter (2 years), more practical, good if you want a faster route to university or aren't sure yet.

Why choose this path?

- Keeps doors open to higher education (universities, professions like doctor, lawyer, etc.).
- Good if you enjoy studying and want a more theoretical/academic route.

2. Erhvervsuddannelse (Vocational Education and Training – EUD/EUX)

Ideal if: You like hands-on work, want to start a career sooner, or learn a skilled trade.

- You learn a trade (e.g., electrician, carpenter, chef, healthcare worker) through a mix of school and apprenticeship.
- **EUX** combines vocational training with academic subjects so you can also apply to university afterward.

Why choose this path?

- You earn money during apprenticeship.
- Learn real-world skills with job opportunities right after.

- EUX keeps doors open to university if you change your mind later.
-

3. 10th Grade

Optional – a year to prepare better if you're not sure what to do next, or want to boost your academic level before starting gymnasium or vocational training.

How to Choose?

Ask yourself:

- Do I enjoy school subjects like math, languages, science? → **Gymnasium (STX, HTX, HHX)**
 - Do I prefer working with my hands or learning by doing? → **Vocational (EUD)**
 - Am I unsure and want more time? → **10th grade**
 - Do I want both a trade and possibility for university? → **EUX**
-

Personal Advice Based on You

Since you're fluent in Danish, born and raised in Denmark, and just 16, you have a strong base to succeed in either academic or vocational education. If you're not yet sure what you want to do long-term, consider this:

- **STX or HHX** if you're interested in university and general education.
 - **EUX** if you like a more practical path but also want the option to go to university.
 - **10th Grade** could be helpful if you feel unsure or want to improve academically/socially before making a decision.
-

Final Thought

If you tell me more about your interests (e.g., favorite subjects, dream job, hobbies), I can give even more tailored advice. Denmark's system is flexible — even if you start on one path, you can usually change direction later. The most important thing is to choose something that fits *you* right now and helps you grow.
