

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Latvia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—that's a strong foundation to build on. Since you're 16, just finished primary school, and are fluent in Danish, you're at a key decision point in the Danish education system. Here are your main options in Denmark after completing **folkeskole (9th or 10th grade)**:

1. Gymnasiale uddannelser (Upper Secondary Education - General Academic Path)

These are typically 3-year programs that prepare you for university. Choose this path if you're interested in academic studies later on.

Main types:

- **STX (Studentereksamen)** – General upper secondary education. Broad subjects: humanities, natural science, and social science.
- **HHX (Højere Handelseksamen)** – Business-oriented. Focus on economics, marketing, and international business.
- **HTX (Højere Teknisk Eksamen)** – Technology and science-focused.
- **HF (Højere Forberedelseseksamen)** – 2-year general education program, good if you prefer shorter studies and a more practical focus.

✓ Good fit if:

- You're considering going to university later.
- You enjoy academic subjects like math, science, languages, or social studies.

2. Erhvervsuddannelser (VET - Vocational Education and Training)

These combine school and hands-on training through apprenticeships. Usually takes 3–5 years depending on the program.

Examples of careers:

- Electrician
- Carpenter

- Chef
- Hairdresser
- IT-supporter
- Healthcare assistant

✓ Good fit if:

- You like learning by doing.
- You want to get a job sooner or learn a specific trade.

3. EUX – A Combination Option

This is a mix of **vocational training and general education**, giving you both a trade and a path to university.

✓ Good fit if:

- You want to keep your options open (work or study later).
- You're hardworking and willing to do a more demanding program.

Extra Note on Your Latvian Background

Being bilingual or having another cultural background can be a big advantage—especially if you're interested in international business, language studies, or EU-related fields. Consider programs where your language and cultural skills can be valuable.

So What Should You Choose?

Let's match based on your interests:

If you like...	Consider this path:
Academics, reading, writing, analysis	STX or HF
Technology, science, engineering	HTX or EUX (technical)
Business, economics, languages	HHX or EUX (business)
Practical work, hands-on learning	Erhvervsuddannelser
A mix of both worlds (trade + academics)	EUX

If you're still unsure, you can:

- **Talk to a UU-vejleder** (educational guidance counselor) at your school or kommune.
- Try **"Brobygning"** (bridge-building programs), where you visit different types of schools to try them out.

If you tell me more about your **interests**, **grades**, or **career goals**, I can give you a much more specific recommendation!
