

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lebanon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself—it's great that you're thinking carefully about your next steps. In Denmark, after completing primary school (folkeskole), you generally have a few main options depending on your interests, goals, and how you enjoy learning. Here's a breakdown of the most common paths, along with some guidance tailored to your situation:

🎓 1. Gymnasium (STX, HHX, HTX) – For Academic/University Pathways

If you're interested in eventually going to university, this is the typical route. There are a few types:

- **STX (Almen Studentereksamen):** General upper secondary education. Offers broad subjects including languages, science, and humanities.
- **HHX (Højere Handelseksamen):** Focuses on business, economics, and international trade. Great if you're interested in working in business or studying business later.
- **HTX (Højere Teknisk Eksamen):** Emphasizes science, technology, and innovation. Ideal if you're into engineering, IT, or science.

💡 *Recommended if:* You like academic learning, enjoy subjects like math, science, business, or languages, and may want to go to university later.

🔧 2. Erhvervsuddannelse (VET – Vocational Education and Training)

This is for people who want to learn a trade or start working sooner. You combine school with real-world experience through apprenticeships. Examples include:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Health care worker

💡 *Recommended if:* You like hands-on work, want to start earning sooner, or are interested in a skilled trade or practical job.

🏠 3. EUX – Vocational + Academic (Best of Both Worlds)

EUX combines vocational training with academic subjects so you can both get a skilled job and still qualify for university later.

💡 *Recommended if:* You're not 100% sure if you want to go to university but want to keep that door open while learning a trade.

4. 10th Grade (10. klasse) – Extra Year for Maturity or Exploring

Some students choose to take a 10th year to become more academically prepared or explore what they want to do.

💡 *Recommended if:* You're unsure of your direction, need better grades for your desired path, or want time to mature and decide.

Considering Your Background and Situation:

Since you're fluent in Danish, grew up here, and just finished primary school, all the options are open to you. Your Lebanese background can also be a strength—bilingual/multicultural skills are valuable in areas like business, translation, international relations, and more.

Here are some questions to help you decide:

- Do you enjoy academic subjects like math, literature, or science?
 - Are you more interested in hands-on work or practical skills?
 - Do you want to go to university later?
 - Are you drawn to helping people, building things, or creating?
-

Final Advice

- **If you're academic and curious about the world**, consider **STX or HHX**.
- **If you want to work with your hands and start a career sooner**, look into **Erhvervsuddannelse**.
- **If you're unsure and want flexibility**, **EUX** is a strong option.
- **If you feel uncertain or need a bit more time**, a good 10th-grade program could be helpful.

You might also consider talking to a **UU-vejleder (educational guidance counselor)** in your area—they can help you figure out your interests and opportunities.

If you tell me more about your interests (e.g., favorite subjects, hobbies, career dreams), I can give even more personalized advice. Would you like that?
