

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lebanon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself—you're in an important and exciting phase of your life. Since you're in Denmark and have just finished **primary school (folkeskole)** at 16, your next step depends on your interests, strengths, and future goals. Let's walk through your options, and I'll help you think through what might suit you best.

🎓 Main Educational Paths After Primary School in Denmark

After 9th or 10th grade, students in Denmark typically choose between two main paths:

1. General Upper Secondary Education (Gymnasiale uddannelser)

If you're interested in **university later** or enjoy academic subjects like science, languages, or social studies.

There are 4 main types:

- **STX (Studentereksamen)** – Broad academic program, good for university.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, IT.
- **HF (Højere Forberedelseseksamen)** – Shorter, more flexible; good for adult learners or people who want a quicker path to university or other programs.

🧠 Good for you if:

- You enjoy school subjects and learning.
- You think you might want to study at university one day.
- You're not sure what you want yet—these programs keep your options open.

2. Vocational Education and Training (Erhvervsuddannelse – EUD)

A mix of **school and hands-on apprenticeship** (praktik) in a workplace.

There are many areas, including:

- Electrician, carpenter, mechanic, hairdresser, chef, healthcare assistant, IT supporter, etc.

🔧 Good for you if:

- You prefer learning by doing.

- You want to start working earlier or learn a trade.
- You want a more practical route that still allows you to continue your education later (for example, via **EUX**, which combines vocational and academic education).

Your Strengths & Background

You mentioned:

- You're **fluent in Danish** 
- You're **born in Denmark**, but your parents are from Lebanon—so you may have **strong cultural and language skills**, maybe even Arabic?
- You're finishing **primary school**, so you're likely ending 9th or 10th grade now.

So you're **well positioned** for any path you choose.

Key Questions to Ask Yourself

1. **Do I enjoy academic subjects (math, history, languages, science)?**
 - Yes → Look into STX, HTX, or HHX
 - No → Consider HF or a vocational program (EUD)
2. **Do I prefer hands-on work and getting into a job faster?**
 - Yes → EUD or EUX could be ideal
3. **Do I want to keep my options open for university later?**
 - Yes → STX, HHX, HTX, or EUX
4. **Do I have a specific interest already? (e.g. tech, business, healthcare, construction)**
 - Yes → Look into programs that match that field directly

My Personal Suggestion Based on What You've Shared

Since you're fluent in Danish, finishing primary school, and open to your next step:

- If you're **interested in learning more academically** and want to keep your options open → **STX or HHX** could be a strong choice.
- If you **like more hands-on learning**, and want to build a profession earlier → **EUD or EUX** (especially EUX if you want a balance of theory and practice) could be great.

Next Steps for You

1. **Talk to a guidance counselor (studievejleder)** – They can give you info about local schools and programs.
2. **Visit school open houses (brobygning)** – Try short programs to see what fits.
3. **Think about your long-term goals** – University, job, starting a business?

If you'd like, I can help you:

- Explore specific programs in your area.
- Compare STX vs HHX vs EUD in more detail.
- Figure out a career that matches your interests.

Just let me know!
