

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lebanon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a big and exciting step — congrats on finishing primary school! Since you're 16, you're at the stage where Danish students typically choose between different upper secondary education paths. The best path depends on your interests, goals, and what you enjoy doing. Here's a clear overview of your main options in Denmark and how to think about choosing the right one:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education - Academic)

These are general academic programs that prepare you for university. You usually spend 3 years here.

Options:

- **STX (Studentereksamen):** Broad academic education. Good if you like subjects like humanities, sciences, or social sciences.
- **HHX (Handelshøjskole-eksamen):** Focuses on business, economics, and marketing. Good for future business or commerce studies.
- **HTX (Teknisk eksamen):** Focus on science and technology. Great if you like math, physics, IT, or engineering.
- **HF (Højere forberedelseseksamen):** Shorter (2 years), more focused. Suitable if you're unsure or want to start university or professional training sooner.

👉 Choose one of these if:

- You enjoy academic subjects and see yourself studying further (e.g., at university or college).
- You're not 100% sure what you want yet and want to keep your options open.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD/EGU)

These combine school with apprenticeships and lead to skilled jobs (crafts, technical work, services, etc.).

Examples:

- Electrician
- Carpenter
- Hairdresser
- Mechanic
- IT Supporter

- Healthcare worker

Programs last 3–5 years depending on your choice.

👉 Choose this if:

- You prefer practical, hands-on work.
- You want to start working sooner or enter a skilled trade.
- You're motivated by learning through doing.

3. Kombinationsforløb / 10. klasse

You can also take an optional 10th grade (either at a regular school or at an *efterskole*) to figure out your path or improve your grades. Some use this year to mature, try new things, or explore different career paths.

A Few Tips Just for You:

- As someone with a multicultural background, you may have strong communication, social, or language skills — those are valuable in many fields like healthcare, business, teaching, and international work.
- If you like helping people, consider healthcare or education pathways.
- If you're into tech or gaming, HTX or IT-focused EUD could be a great fit.
- Don't rush — it's okay to explore before deciding.

Want Help Choosing?

Let me know:

- What subjects you enjoy most?
- Do you prefer theory or practical work?
- What are your interests or dreams for the future?

With that, I can give you a more personalized recommendation.
