

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lesotho. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself—you're at a really exciting point in life with a lot of possibilities ahead of you. Since you've just finished primary school in Denmark and you're fluent in Danish, you have access to the full range of Danish educational options. The best path for you depends on your interests, strengths, and long-term goals. Here's an overview of your options and some guidance to help you choose:

Your Main Options After Primary School in Denmark

After 9th or 10th grade (which it sounds like you've completed), you typically move on to **youth education (ungdomsuddannelse)**. The two main tracks are:

1. Gymnasial Education (General Upper Secondary Education)

This is the academic path that prepares you for university.

Main types:

- **STX (Studentereksamen)** – Focuses on humanities, social sciences, and natural sciences.
- **HHX (Higher Commercial Examination Programme)** – Focuses on business, economics, and languages.
- **HTX (Higher Technical Examination Programme)** – Focuses on technology, science, and innovation.
- **HF (Higher Preparatory Examination)** – A shorter 2-year option, often used by older students or those wanting a more flexible path to higher education.

Choose this path if:

- You enjoy school subjects and want to go to university in the future.
- You're interested in things like science, social studies, business, or languages.
- You're not yet sure what kind of career you want, but want to keep your options open.

2. Vocational Education and Training (EUD/EUX)

This path prepares you directly for a profession or trade, often combining school with apprenticeship.

Two main types:

- **EUD** – Focused on practical training; leads directly to work in trades like electrician, mechanic, chef, carpenter, healthcare, etc.
- **EUX** – Combines vocational training with general subjects so you can also go to university later.

✔ Choose this path if:

- You like working with your hands or in real-world settings.
- You want to start earning earlier.
- You're interested in learning a trade or becoming a skilled worker.
- You might still want the option of going to university (then EUX is better than EUD).

How to Decide?

Here are some questions to ask yourself:

- **What subjects do I enjoy most in school?**
- **Do I prefer practical work or academic learning?**
- **Do I want to go to university later on?**
- **Am I more interested in starting a career earlier or studying longer?**

Bonus: Consider Your Unique Background

With your Lesotho heritage, you could also:

- Learn more about African history, languages, or international relations.
- Get involved in intercultural projects or youth organizations in Denmark.
- Explore careers that connect Denmark and Africa, like development work, international business, or diplomacy.

Suggestion Based on Your Situation:

If you're still exploring your interests and want to keep your future options open, **STX** or **HHX** could be a good fit. If you're more into hands-on learning and might want to start working sooner, **EUX** gives you the best of both worlds.

Would you like help comparing STX vs. HHX vs. HTX in more detail? Or do you want to explore some career paths based on your interests?
