

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liberia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that—you're in an important and exciting stage of life! In Denmark, after finishing primary school (folkeskole), you have several good options depending on your interests, learning style, and future goals. Here's a breakdown of the most common paths and some guidance to help you choose:

1. Gymnasium (STX, HHX, HTX, HF) – Upper Secondary Education

These are academic programs that prepare you for university. They usually last 2-3 years.

- **STX** (Almen studentereksamen): Broad focus – good if you're interested in subjects like Danish, history, languages, and science.
- **HHX** (Højere handelseksamen): Focus on business, economics, and marketing.
- **HTX** (Højere teknisk eksamen): Focus on science, technology, and innovation.
- **HF** (Højere forberedelseseksamen): A 2-year program with a more flexible structure – great if you want a faster route to certain professions or need a more practical focus.

 *Recommended if:*

You enjoy studying, want to keep doors open for university, or are unsure exactly what you want yet but want broad options.

2. EUD / EUX – Vocational Education and Training

This path prepares you directly for a profession—such as electrician, carpenter, health care assistant, chef, etc.

- **EUD**: Focused on hands-on work. You'll alternate between school and internships.
- **EUX**: Combines vocational training with a more academic upper secondary degree, giving you access to university as well.

 *Recommended if:*

You prefer learning by doing, want to start working sooner, or have a specific job/field in mind.

3. 10th Grade

This is an optional extra year after primary school to get better prepared for the next step. It can be a good choice if:

- You're unsure what to do next.

- You want to improve your grades or social skills.
- You want time to grow and explore your interests.

🔴 *Recommended if:*

You need more time to decide or build confidence before jumping into gymnasium or vocational training.

Special Tip – Leverage Your Background

Being fluent in Danish *and* having Liberian heritage is a strength. It gives you multicultural insight, and that can be valuable in fields like:

- **Healthcare** (nursing, psychology, social work)
- **Business & international trade**
- **Education**
- **Public service or NGO work**

If you're interested in helping people, working across cultures, or giving back to your community, keep that in mind when choosing.

How to Choose? Ask Yourself:

- Do I like studying and reading, or do I prefer hands-on tasks?
 - Do I want to go to university later, or start working sooner?
 - What subjects or activities make me feel excited or proud?
-

Final Advice:

If you're unsure, **talk to a guidance counselor (studievejleder)** at your school or local education center. They can give you personal advice, help with applications, and even arrange visits to schools or programs.

If you'd like, I can help you explore specific careers, make a comparison of gymnasium types, or help you look at a specific area you're interested in. Just tell me a bit more!
