

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liberia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking ahead about your next steps. Since you've just finished primary school in Denmark (which ends around 9th or 10th grade), you're now at the point where you can choose among several educational paths depending on your interests, goals, and strengths.

Here are the main options in Denmark after primary school (Folkeskole):

1. Gymnasiale Uddannelser (General Upper Secondary Education)

This is for you if you're considering university later on or want to keep your options open.

- **STX (Studentereksamen):** Focuses on academic subjects like languages, science, and humanities.
- **HHX (Højere Handelseksamen):** Focuses on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen):** Focuses on science, technology, and technical subjects.
- **HF (Højere Forberedelseseksamen):** A 2-year program, more practical and flexible, good for adult learners or those who want a quicker route to further education.

Recommended if:

- You enjoy studying subjects like math, languages, science, or economics.
- You're considering university later (law, medicine, engineering, teaching, etc.).
- You like academic environments.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This combines school with practical work experience. You can become a carpenter, electrician, health care assistant, IT-supporter, chef, etc.

- Includes **EUX**, which gives you both a vocational and academic diploma – great if you want hands-on work now but also want the option of university later.

Recommended if:

- You prefer learning by doing.
- You want to enter the job market faster.
- You're interested in skilled trades, IT, health care, or service jobs.

3. International Opportunities or Other Paths

- **Efterskole (1-year boarding school):** A popular choice at your age. Some focus on sports, arts, or academics. It can help you mature and explore your interests before choosing a path.
- **10th grade:** Optional, but can be helpful if you want to improve grades or need time to decide.
- **Apprenticeships or work:** Some people work for a while before continuing education, especially if they want practical experience.

How to Choose?

Here are a few questions to guide your decision:

1. **Do you enjoy academic work like writing, studying, and tests?**
→ If yes, consider STX, HHX, or HTX.
2. **Do you prefer working with your hands, being active, or using technology?**
→ Then an EUD or EUX path might be better.
3. **Are you unsure what you want to do yet?**
→ 10th grade or efterskole could give you time and perspective.

Since you're fluent in Danish and have a Liberian background...

You may also consider:

- Using your bilingual or multicultural background in careers like teaching, social work, international relations, or translation.
- Exploring student support or mentoring programs for young people with immigrant backgrounds. Some can give you extra guidance and help you network.

Final Advice:

It's totally okay not to have it all figured out yet. Here's what you can do right now:

- Talk to a **studievejleder (student counselor)** at your school or local youth education center.
- Visit <https://ug.dk/> – Denmark's official education guide.
- If possible, try a **praktik (internship)** or **bridge-building program** to explore different paths.
