

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lithuania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great place to start from — being bilingual, young, and having just finished primary school gives you many options. Since you're in Denmark and just finished **folkeskolen**, your next educational step would usually be **youth education** ("ungdomsuddannelse").

Here are your main options and how to think about them:

1. Gymnasiale uddannelser (Upper Secondary Education - Academic Path)

These prepare you for university and other higher education. Good if you like academic subjects, are curious, and want to keep doors open.

Options include:

- **STX (Studentereksamen)** – Broad academic program, often seen as the “classic” high school. Good for humanities, science, and social studies.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere Forberedelseseksamen)** – A 2-year program, good if you're more practically oriented but still want access to higher education.

 **Best for you if:** You enjoy school, want to go to university, and like academic subjects.

2. Erhvervsuddannelser (Vocational Education and Training - Practical Path)

This leads to skilled trades and jobs, and can also lead to further education (like becoming a master or going into management).

Examples:

- Electrician, carpenter, mechanic, hairdresser, IT technician, etc.
- Some programs combine school and internship (EUD), and some are more flexible (EUX – combines with a gymnasial level diploma).

 **Best for you if:** You like working with your hands or in practical environments, and want to start working earlier.

3. International options

Given your Lithuanian background, you might also consider:

- **IB (International Baccalaureate)** – If you're very academically ambitious and want international options.
 - Or summer programs/study opportunities in Lithuania if you're interested in connecting with your roots or learning Lithuanian at a higher level.
-

How to Choose?

Ask yourself:

- Do I like reading, writing, and academic learning?
 - Or do I prefer more practical, hands-on work?
 - Do I want to go to university or get into work sooner?
 - What subjects excite me most?
-

Personal Recommendation (based on what you shared)

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, I'd recommend **STX** or **HHX** if:

- You're not sure what you want yet.
- You want to keep your options open.
- You're generally good at school and don't mind studying.

If you already know you enjoy a trade (IT, design, mechanics, etc.), **EUX** could be a smart path — it gives you both practical skills *and* access to higher education.

If you want, I can also help you explore specific programs in your area or suggest schools nearby. Would that be helpful?
