

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Luxembourg. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking seriously about your next step after primary school. Since you're in Denmark and just finished **folkeskole**, you're at the point where you can choose between several **youth education pathways**. I'll guide you through the main options, and then offer recommendations based on different interests.

Your Main Education Options in Denmark (After 9th or 10th Grade)

1. General Upper Secondary Education (Gymnasiale Uddannelser)

These prepare you for higher education (university, university colleges, etc.).

- **STX (Almen Studentereksamen)** – Broad academic education with focus on humanities, social sciences, and natural sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere Forberedelseseksamen)** – A 2-year academic program for those who prefer a shorter path or more mature learning environment.

2. Vocational Education and Training (Erhvervsuddannelse / EUD)

- More hands-on and practical, combining school with apprenticeships.
- Prepares you for jobs like electrician, carpenter, hairdresser, mechanic, etc.
- Also gives you a pathway to further education (like vocational academy or some university programs).

Which Path Might Be Right for You?

Here are **some key questions** to ask yourself:

- **Do you enjoy academic subjects?** Like reading, writing, analyzing, etc.
- **Do you prefer hands-on, practical learning?** Building, creating, or working with tools or people?
- **Do you think you want to go to university someday?** Or are you more interested in starting work sooner?
- **Are you interested in business, science, arts, or something else?**

My Recommendations Based on Common Goals

If you want to keep all doors open:

👉 **STX** is a solid and flexible choice. It gives you access to all higher education options later. Since you're fluent in Danish and born in Denmark, you'll likely feel comfortable with the academic expectations.

If you're interested in business or international work:

👉 **HHX** could be a great fit, especially with your Luxembourgian background—maybe a future in international business, EU institutions, or economics?

If you're into science, technology, or engineering:

👉 **HTX** would give you a strong technical and practical foundation with math, tech, and science.

If you want to work with your hands or get a job sooner:

👉 **EUD** gives you real-world experience, pay during training, and a clear career path. You can always go on to further education later (e.g., EUX or vocational academies).

Not sure yet?

That's very normal at your age. You can consider:

- Taking **10th grade** (optional), which gives you one more year to mature and decide.
- Talking to a **UU-vejleder** (youth guidance counselor) at your school or local kommune.

Bonus idea: Use your Luxembourgian roots

- Maybe consider learning **French or German** (official languages of Luxembourg).
- These skills can open doors in **EU careers**, international business, or studies abroad later.

If you can tell me more about your **interests, hobbies, or favorite subjects**, I can give you more personalized advice. Want to do that?
