

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Madagascar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great question—and it's fantastic that you're thinking seriously about your next steps. In Denmark, finishing primary school (Folkeskole) typically means you're ready to choose between a few educational paths, depending on your interests, strengths, and long-term goals. Since you're 16 and fluent in Danish, you're well-positioned to take advantage of the options available. Here's a breakdown of the main paths and some thoughts to help you choose:

1. Gymnasium (General Upper Secondary Education)

- **What is it?** A 3-year academic program that prepares you for university.
- **Options:**
 - **STX (Alment Gymnasium):** Broad, academic subjects (humanities, sciences, social sciences).
 - **HHX (Handelsskole):** Focus on business, economics, and international trade.
 - **HTX (Teknisk Gymnasium):** Emphasis on science, technology, and engineering.
- **Good if you want:** To keep your options open for university later on.
- **Recommended if you're:** Strong in academics, enjoy school subjects, and want to explore more theoretical knowledge.

2. EUD (Erhvervsuddannelse – Vocational Education and Training)

- **What is it?** Combines classroom learning and apprenticeships in a company.
- **Examples:** Electrician, carpenter, chef, hairdresser, social and health care assistant.
- **Length:** Usually 3-5 years, depending on the trade.
- **Good if you want:** To start working sooner and prefer hands-on learning.
- **Recommended if you're:** Practical, like doing things with your hands, and want a job-focused path.

3. EUX (Combination of Vocational Training and Academic Education)

- **What is it?** A hybrid that gives you both a vocational qualification and a study-preparatory diploma.
- **Length:** About 4-5 years.
- **Good if you want:** A profession but also want the option to go to university later.
- **Recommended if you're:** Ambitious, hardworking, and not sure if you want to work or study after.

💡 Things to Think About

- **What subjects do you enjoy?** Science, literature, business, art?
 - **Do you prefer practical or academic work?**
 - **Do you want to go to university?** Or start working after secondary education?
 - **Are there career paths you're already interested in?**
-

🕒 Personalized Suggestion

Since you just finished primary school and are fluent in Danish, and assuming your grades are decent:

- If you're **uncertain about your future and want to keep doors open**, I'd recommend starting with **STX or HTX**, depending on whether you like sciences or a general education.
 - If you know you like **business or entrepreneurship**, then **HHX** could be a great fit.
 - If you're more **practical and career-focused**, EUD or EUX might suit you better, especially if you want to earn while you learn.
-

Would you like help choosing between these based on your favorite subjects or future career dreams? Let me know what you enjoy or what you're good at, and I can give you a more tailored suggestion.
