

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malaysia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! It's great that you're thinking carefully about your next steps. Since you just finished primary school in Denmark (which typically ends around grade 9 or 10, depending on how you're counting), your next step would usually be **secondary education**, and in Denmark, you've got a few different options depending on your interests, strengths, and long-term goals.

Here's a breakdown of your main options, along with some guidance based on different interests:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university.

The main ones are:

- **STX (Studentereksamen)** – General and broad, with humanities, natural sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focused on business, economics, and international studies.
- **HTX (Højere Teknisk Eksamen)** – Focused on science, technology, and innovation.
- **HF (Højere Forberedelseksamen)** – Shorter 2-year program, more practical, and often for people who want a more flexible or alternative path.

✅ **Choose one of these if:**

You enjoy academic subjects and might want to go to university later on.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These programs prepare you for a job or trade, often combining school and apprenticeship (praktik).

Examples:

- Electrician
- Mechanic
- Hairdresser
- Carpenter
- IT Support
- Health Care Assistant

✅ Choose this if:

You like practical learning and want to work in a specific profession after a few years of training.

💡 Things to Consider:

1. Do you know what career you want yet?

- If yes, choose a path that leads toward that job.
- If no, STX or HF can give you more time and flexibility to figure it out.

2. What subjects do you enjoy or do well in?

- Math and science → HTX
- Business and language → HHX
- Arts and literature → STX
- A bit of everything but want a shorter path → HF

3. Do you want to study at university later?

- Then a gymnasial education is the typical route.
 - Some vocational tracks can also get you into certain higher educations, especially if you take an extra course called **EUX** (which combines vocational and academic learning).
-

🌍 Extra Note for You:

Being bilingual and having a multicultural background (Danish + Malaysian) can be a huge asset in today's global world. If you're interested in international business, diplomacy, language, or even working abroad someday, you might consider paths like **HHX** or **STX with language focus**.

✅ My Recommendation (based on what you've shared):

If you're not yet sure what you want to do, and you're academically strong or enjoy school subjects, **STX** is often the safest and most flexible path. It gives you 3 years of general education and keeps all doors open, including university or later switching to something more practical.

But if you already have an idea of a trade or job you'd like, then a **vocational program (EUD)** or **EUX** might make more sense.

If you'd like, I can help you:

- Compare two specific programs (like STX vs. HHX)
- Suggest options based on your favorite school subjects
- Explore careers that fit your interests
