

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mali. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've just finished primary school—congrats! Since you're in Denmark and have completed *folkeskolen*, your next educational step typically depends on your interests, strengths, and long-term goals. Here are the main options you can consider, with a bit of guidance for each:

♦ 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are more academic and prepare you for university.

Options:

- **STX (Almen Studentereksamen):** Broad education with focus on science, languages, and humanities.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and languages.
- **HTX (Higher Technical Examination):** Focus on science, technology, and innovation.
- **HF (Higher Preparatory Examination):** A bit shorter (2 years) and more practical, good if you prefer a more direct path to university or professional school.

Choose this path if:

- You enjoy academic subjects.
- You're thinking about going to university later.
- You like reading, writing, analyzing, or scientific thinking.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This combines school and paid internships/apprenticeships.

Fields include:

- Healthcare (e.g. social- og sundhedsassistent)
- Tech & IT
- Construction
- Mechanics
- Hospitality & culinary
- Retail & commerce

Choose this path if:

- You want to learn by doing.
- You like hands-on work or know what kind of job you want.
- You want to enter the workforce sooner (but can still continue your studies later with *EUX* or *Voksenuddannelse*).

♦ 3. **EUX (Vocational + Academic Combo)**

This combines a vocational education with upper secondary academic subjects. You get both a vocational qualification *and* a path to university.

Choose this if:

- You want the best of both worlds—practical skills and academic options.
- You're not 100% sure whether you want to work right after or study more later.

♦ 4. **10th Grade (10. klasse)**

Optional. Some students take it to:

- Improve grades.
- Mature personally.
- Decide between vocational vs. gymnasial paths.

Choose this if:

- You're unsure and want more time to decide.
- You feel you'd benefit from an extra year to strengthen academic skills or confidence.

Recommendations Based on Your Background

Given that:

- You're fluent in Danish,
- You've completed school in Denmark,
- You may have a multicultural background that gives you unique perspectives,

You could succeed in **any** of these paths. But here are some personalized suggestions:

1. **If you like school and want to keep doors open**, consider **STX, HHX, or HTX**. They give you flexibility and keep your university options wide.
2. **If you want a job faster** and are more practical-minded, go for **EUD** or **EUX**—especially if there's a field you're already interested in, like IT, health, mechanics, or something creative.
3. **If you're unsure**, doing **10th grade** could be smart—it's common in Denmark and gives you time to explore your interests and build confidence.

If you want, I can help you figure out which specific type of education might fit you best by asking a few short questions about your interests. Would you like that?
