

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mali. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking seriously about your next step after primary school. In Denmark, after completing *folkeskolen* (primary and lower secondary education), you have several options depending on your interests, strengths, and future goals. Here are the main educational paths you can consider:

♦ 1. General Upper Secondary Education (Gymnasiale uddannelser)

These are academic programs that prepare you for university.

Options include:

- **STX (Almen studentereksamen):** Broad, general education — good for university later.
- **HHX (Højere handelseksamen):** Focus on business, economics, and languages.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and innovation.
- **HF (Højere forberedelseksamen):** 2-year program for students more practically or socially inclined. Can be a second chance path.

Best if you:

- Like academic subjects
- Might want to go to university or college later
- Are still figuring out what kind of job you want

♦ 2. Vocational Education and Training (Erhvervsuddannelse / EUD)

This combines school with practical training in a workplace. You finish with skills to go directly into a job, though some also continue to higher education.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Health care assistant
- IT-supporter

Best if you:

- Want to learn a trade or get a job quickly
- Prefer hands-on learning over classroom work
- Are motivated by doing practical things

♦ 3. Kombinerede veje (EUX)

This combines a vocational education (EUD) **with** a general upper secondary exam — you get both practical skills **and** the chance to go to university.

Best if you:

- Want to keep your options open
- Are interested in working but maybe going to university later

♦ 4. 10th Grade (10. klasse)

Optional, but useful if you want to get stronger academically before choosing a path.

Best if you:

- Want more time to decide
- Feel like you need better grades or more maturity before starting a longer program

♦ My Recommendation

Since you're just finishing primary school and are fluent in Danish, here are some questions to help guide your choice:

- Do you like school and academic subjects?
- Do you enjoy working with your hands or solving practical problems?
- Are you interested in business, technology, health, or something else?

If you're unsure, **10th grade** is a solid way to explore more before choosing a longer commitment. If you're motivated and have decent grades, **STX**, **HHX**, or **HTX** are great choices that open doors to university.

If you enjoy learning by doing, **EUD** or **EUX** are excellent and respected in Denmark — and you'll be job-ready faster.

Would you like to tell me a bit more about what subjects you enjoy, or what kind of jobs or careers interest you? That way, I can give a more personal recommendation.
