

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great place to be—you're at an exciting turning point, and it's really good that you're thinking about your future. Since you're in Denmark and just finished primary school (likely after 9th or 10th grade), you have a few solid options for what comes next, depending on your interests, strengths, and goals.

Here's a breakdown of your main educational paths after primary school in Denmark:

1. Gymnasium (STX, HHX, HTX, HF) – Academic Upper Secondary Education

If you're interested in going to university in the future, this is a good route.

- **STX (Alment Gymnasium):** Broad academic education – ideal if you like subjects like Danish, history, languages, science.
- **HHX (Business Gymnasium):** Focus on business, economics, and international trade.
- **HTX (Technical Gymnasium):** Focus on technology and science – good if you like math, IT, or engineering topics.
- **HF (Higher Preparatory Examination):** A bit shorter and more flexible – great if you want something slightly less academic but still university-accessible.

Recommended if:

- You're curious academically
- You want to keep university as an option
- You're still figuring out what you want long-term

2. EUD (Erhvervsuddannelse) – Vocational Education and Training

If you want to start working sooner or enjoy practical/hands-on work.

- You can train to become a carpenter, electrician, hairdresser, chef, healthcare worker, IT-supporter, etc.
- Combines school with apprenticeship/workplace training.
- After a vocational education, you can start working right away or even go further with programs like **EUX** or **short-cycle higher education**.

EUX: Combines vocational training with more academic subjects, so you keep the option to go to university later.

Recommended if:

- You like practical, hands-on work
- You want a clearer path to a job
- You might want to start working and earning sooner

Things to Think About Before Choosing

1. **What subjects do you enjoy the most?** (Science, tech, languages, economy, etc.)
2. **Do you like school and studying, or do you prefer practical tasks?**
3. **What are your long-term dreams?** (University? Working in a trade? Starting a business?)

Personal Suggestions (based on what you've shared)

Since you're fluent in Danish, born and raised in Denmark, and have a multicultural background, you're in a strong position to succeed in a variety of fields.

Here are some specific ideas to explore:

- **HHX** if you're interested in business, entrepreneurship, or international work
- **HTX** if you enjoy science, technology, or engineering
- **EUX** if you're hands-on but also want to keep doors open for higher education

Future-Proof Careers to Consider

These paths are in demand in Denmark and internationally:

- IT and programming
- Healthcare (nurses, social workers, therapists)
- Engineering and green energy
- Skilled trades (electrician, mechanic, etc.)
- Business, finance, logistics

If you want, you can tell me more about your interests, and I can give more tailored advice. For example:

- What are your favorite school subjects?
- Do you prefer theoretical or practical work?
- Do you have a dream job or idea of what kind of life you want?

Let me know, and I'll help you map out your best next step.
