

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking seriously about your future already. Since you're 16, fluent in Danish, and just finished primary school (which in Denmark ends at 9th or 10th grade depending on the path), you're likely deciding between a few main options in the Danish education system. I'll break them down with some guidance based on where you might want to go:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic paths that prepare you for university.

A. STX (Alment Gymnasium)

- **Focus:** Broad academic education — Danish, English, science, social studies, etc.
- **Best if:** You're still exploring or you're interested in university studies later.
- **Duration:** 3 years
- **Career paths:** University programs like law, medicine, engineering, etc.

B. HHX (Higher Commercial Exam)

- **Focus:** Business, economics, marketing, languages.
- **Best if:** You're interested in international business, management, or entrepreneurship.
- **Duration:** 3 years
- **Career paths:** Business school, international trade, finance, etc.

C. HTX (Higher Technical Exam)

- **Focus:** Technology, natural sciences, IT, and innovation.
- **Best if:** You like math, science, tech, or want to become an engineer or technician.
- **Duration:** 3 years

D. HF (Higher Preparatory Exam)

- **Focus:** Shorter, more focused academic path.
- **Best if:** You want a more flexible or faster way to get access to vocational education or university.
- **Duration:** 2 years

2. Erhvervsuddannelser (Vocational Education and Training, EUD)

These prepare you to work directly in a trade or profession. You get both school and paid work experience (praktik).

- **Examples:** Carpenter, electrician, chef, hairdresser, health care worker.
- **Best if:** You prefer hands-on work and want to start working sooner.
- **Duration:** 2-5 years depending on the program.
- You can still go to higher education later via *EUX*.

EUX – Best of both worlds

- A combination of vocational training **and** academic subjects.
- Lets you become a skilled worker **and** keeps the door open for university.
- Great if you want a solid backup plan with options.

So, what should you do?

Ask yourself a few things:

- Do I enjoy academic subjects and want to go to university? → **STX, HHX, HTX, or HF**
- Do I want to work with my hands or get a job sooner? → **EUD or EUX**
- Do I know what I want to do yet? If not, STX or HF are good general choices.

✨ Tips for You Personally:

Since you're fluent in Danish and grew up in Denmark with Mauritanian roots, you also have a multicultural perspective that's really valuable.

- If you're interested in **helping people**, consider social work, healthcare, or teaching.
- If you're into **business or entrepreneurship**, HHX or EUX (business path) could be great.
- If you like **tech or engineering**, HTX or EUX (technical path) fits well.
- If you're unsure and want to keep all doors open, **STX or HF** are safe and flexible choices.

Would you like help matching your interests (like hobbies or favorite school subjects) to a specific education path? I'd be happy to go deeper into that with you.
