

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritius. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself! You're at an exciting point in life where you get to start shaping your future based on your interests, strengths, and goals. Since you've just finished primary school in Denmark, you're likely considering options for **secondary education** (ungdomsuddannelse). Let's walk through your main options and what might fit you best.

Your Main Educational Options After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs are academic and prepare you for university or other higher education.

- **STX (Almen studentereksamen)** – Broad and academic. Good if you're interested in humanities, science, or social studies.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere forberedelseksamen)** – A 2-year program (usually for slightly older students or those wanting a more flexible path).

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

Practical, hands-on training that prepares you for a specific job. You can become anything from a carpenter to a chef to a healthcare worker. Some programs also give access to further education.

3. Kombinerede forløb (EUX)

A combination of vocational training and a general upper secondary education. You get both a vocational qualification and the option to go to university later.

Choosing What's Right for You

Here are a few questions to help guide your choice:

- **Do you enjoy academic subjects and want to go to university later?**
→ Consider **STX**, **HHX**, **HTX**, or **HF**.
- **Do you prefer learning by doing and want to start working earlier?**
→ Consider **EUD** or **EUX**.
- **Do you have a strong interest in business, tech, health, or design?**
→ Your interest can guide which specific program fits best.

My Recommendation (Based on What You Shared)

Since you're fluent in Danish, were born and raised in Denmark, and just finished primary school, you're well-positioned to succeed in **any** of the paths. But if you're **still exploring your interests** and you enjoy school, I recommend:

→ **STX** – It gives you a broad education and keeps your options open for university or other careers later. You can specialize later in areas like science, languages, or social studies. It's great for figuring out what you're passionate about.

If you're more interested in **business or entrepreneurship**, consider:

→ **HHX**

If you're into **technology or science**, think about:

→ **HTX**

Final Tip

Visit the schools near you, talk to students and counselors, and consider doing a **brobygning (bridge-building)** program where you try out a school for a week or two. It helps a lot with making the right decision.

If you'd like, I can help you:

- Explore specific schools in your area
- Match programs to your interests (e.g., tech, art, healthcare, etc.)
- Understand how to apply and prepare for each program

Just let me know!
