

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritius. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's great — you're in an exciting position with lots of possibilities ahead. Since you're 16 and have just completed primary/lower secondary school in Denmark (which typically ends with 9th or 10th grade), your next step is usually one of the following main paths in the Danish education system:

Three Main Paths After Primary School in Denmark

1. **Gymnasiale uddannelser (Upper Secondary General Education)**

Examples: STX, HHX, HTX, HF

These are academically focused and prepare you for university.

- **STX** (Almen studentereksamen): Broad academic education (humanities, sciences, languages).
- **HHX** (Handelsskole): Focus on business, economics, and languages.
- **HTX** (Teknisk gymnasium): Focus on technology, science, and innovation.
- **HF** (Højere forberedelseseksamen): A shorter, 2-year program, more practical, often for those who want to continue to university but prefer a different setup.

Good if you want to:

- Go to university later (law, medicine, business, engineering, etc.)
- Keep your options open

2. **Erhvervsuddannelser (Vocational Education and Training - VET)**

You learn a trade and often start working while you study.

- Examples: electrician, chef, mechanic, social and health worker, hairdresser
- Usually combines school with an apprenticeship

Good if you want to:

- Start working sooner
- Learn hands-on and not sit in a classroom all day
- Possibly start your own business later

3. **Kombinerede forløb og FGU (Forberedende Grunduddannelse)**

- For students who need more support or aren't sure what to choose yet.
- Focuses on personal development, practical skills, and preparation for work or education.

✓ What Should You Consider?

Ask yourself:

- Do I like studying academically, or prefer practical, hands-on learning?
- Do I know what I want to be, or am I still exploring?
- Do I want to go to university in the future?
- Am I motivated by business, science, social work, design, etc.?

🔍 Some Personalized Suggestions

Since:

- You're fluent in Danish
- You're born and raised in Denmark with multicultural roots
- You've just finished primary school

You might consider:

👉 If you're interested in university later:

- **STX** if you enjoy a wide range of subjects like languages, history, or biology.
- **HHX** if you're interested in business, entrepreneurship, or economics.
- **HTX** if you're into tech, engineering, or science.

👉 If you want to start working earlier or do something more hands-on:

- Choose a **VET (erhvervsuddannelse)** in a field that interests you — for example IT, hospitality, construction, or design.

💬 Final Thoughts

You don't need to have your whole life figured out now. A lot of Danish students switch paths, and that's totally normal. Think about what **excites you**, what you're **curious** about, and even what you **don't enjoy**. And talk to a **UU-vejleder (Youth Guidance Counselor)** — they're trained to help students just like you choose the best path.

If you tell me more about your interests (e.g. subjects you like, careers you admire, how you prefer learning), I can help recommend something even more specific.
