

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mexico. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking seriously about your future. In Denmark, after finishing **primary school (folkeskole)**, you have several educational paths to choose from, depending on your interests, academic strengths, and career goals. Here's a breakdown of your main options and some tailored advice to help you choose the right one:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university.

a. STX (Studentereksamen) – General upper secondary

- Focus: Broad subjects including humanities, sciences, and social sciences.
- Good for: Keeping options open, going to university later.
- Language: Danish.
- Ideal if: You enjoy a mix of subjects and might want to go to university.

b. HHX (Higher Commercial Examination)

- Focus: Business, economics, marketing, international studies.
- Good for: Careers in business, marketing, or studying business at university.
- Ideal if: You're interested in entrepreneurship, finance, or international work (maybe linking your Danish-Mexican background).

c. HTX (Higher Technical Examination)

- Focus: Technology, science, IT, and engineering.
- Good for: Engineering, tech, or science careers or university in those fields.
- Ideal if: You love problem-solving, programming, or science.

d. HF (Higher Preparatory Examination)

- Shorter (2 years), more practical.
- Good for: Those who want to enter health, social care, or teacher training.
- Ideal if: You want a quicker path to university or practical professions.

2. Erhvervsuddannelser (Vocational Education and Training - EUD/EGU/HTX/HHX combi)

- Learn a profession (like carpenter, electrician, chef, healthcare worker).
- Split between school and apprenticeship (praktik).
- Takes 3-5 years depending on the field.
- Good if: You prefer hands-on learning and want to start working sooner.
- Some programs even allow you to continue on to higher education (Erhvervsakademi or Professionshøjskole).

Special Note for Bilingual Background

Being fluent in both Danish and Spanish, and having a multicultural background, is a real **strength**. This could open doors in:

- **International business or trade (HHX route)**
- **Translation or interpretation**
- **Diplomacy or international relations**
- **Tourism or hospitality (vocational or HHX)**
- **Teaching or social work (HF or STX)**

What to Ask Yourself

- Do you enjoy **theoretical subjects**, or do you prefer **practical, hands-on work**?
- Do you see yourself going to **university**, or would you rather **start a job earlier**?
- Are there any **careers** you're already interested in?
- Would you consider a **global or international career**?

My Recommendation Based on What You've Shared

Since you're academically strong enough to consider all options and fluent in Danish, I'd suggest you look closely at:

- **HHX**: Especially if you're interested in business, international work, or entrepreneurship. You could combine your background with global trade or work abroad later.
- **STX**: If you're not sure yet what you want to do and want to keep your options open, especially if you enjoy languages, humanities, or sciences.

If you prefer hands-on work or already have a job type in mind, a **vocational education (EUD)** might be a better, quicker fit.

Would you like help finding schools near you that offer specific programs? Or are you interested in what job options come from each path?
