

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Monaco. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thanks for sharing your background! Since you're 16, just finished primary school in Denmark, and are fluent in Danish, you're at a good point to consider different educational and career options. Denmark has a flexible education system, so let's break down your options and match them with your situation and potential interests.

Your Main Educational Paths in Denmark After Primary School

At this point, you usually choose between **general upper secondary education** and **vocational education and training (VET)**. Here's a breakdown:

1. Gymnasiale uddannelser (Upper Secondary Education – 3 years)

These programs prepare you for **university** and are best if you're interested in academic subjects or not yet sure what career you want.

- **STX (Almen studentereksamen)** – Broad focus (humanities, sciences, social sciences). Most common choice.
- **HHX (Højere handelseksamen)** – Focus on business, economics, international trade. Good for careers in business or further studies in business-related fields.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and engineering.
- **HF (Højere forberedelseseksamen)** – Shorter 2-year program, more practical and flexible, good if you're unsure or want to enter a specific vocational program or teacher/nursing track later.

Recommended if:

- You enjoy academic work.
- You want to keep university options open.
- You're still exploring your interests.

2. Erhvervsuddannelser (Vocational Education and Training – 2–5 years)

These combine **school and paid apprenticeships** and lead to skilled jobs like carpenter, chef, IT support, electrician, or even hospital professions like dental assistant.

Recommended if:

- You prefer hands-on learning.

- You want to enter the workforce faster with a profession.
- You're interested in specific trades or technical careers.

You can still go to university later via **EUX**, which combines vocational training with general education.

3. International Option

Given your connection to Monaco and potential international mindset, you might also consider:

- **International Baccalaureate (IB)** – Offered in some Danish schools. Taught in English, recognized worldwide.
- **French schools in Denmark** – If you or your family are francophone, Lycée Français Prins Henrik in Copenhagen might be relevant.

Recommended if:

- You're aiming for international university or a global career.
- You're fluent in English or French and want an academic challenge.

Questions to Ask Yourself

Here are a few questions to help narrow your path:

1. **Do I want to go to university?**
 - Yes → STX / HHX / HTX / IB
 - No / Not sure → HF or VET (EUD/EUX)
2. **Do I learn best through theory or hands-on practice?**
3. **Am I interested in business, science, humanities, or something technical?**
4. **Do I want to work right after school, or study longer?**

Suggested Steps for You

1. **Visit "UddannelsesGuiden" (ug.dk)** – Explore detailed info about Danish programs.
2. **Talk to an educational advisor (UU-vejleder)** – You have the right to guidance.
3. **Visit schools' open house days** – Get a feel for gymnasium or vocational programs.
4. **Think long-term:** What careers interest you? Even loosely. That can guide your track.

Example Path

If you're academically inclined and not sure yet:

→ **STX or HHX** (depending on your interest in general vs. business topics)

If you're more practical and want to enter a trade or job more quickly:

→ **EUD or EUX** (e.g., IT support with EUX = technical job + university option)

If you might move internationally later, or want an English education:

→ **International Baccalaureate (IB)**

Would you like me to help match your interests (if you share them) to a specific education type or future career path?
