

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mongolia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking carefully about your next step. Since you've just finished primary school in Denmark (9th or 10th grade, depending on your school), you're at a key decision point. Here's a breakdown of your main options in Denmark, along with who they suit best:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are general academic programs and are the most common choice if you're thinking about going to university later.

Options:

- **STX (Studentereksamen)** – Strong in humanities, natural sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere Forberedelseksamen)** – A 2-year program, more flexible, often for those who didn't go directly to STX/HTX/HHX.

✓ Best for:

If you're academic, curious, and want to keep your university options open.

2. Erhvervsuddannelse (Vocational Education and Training - EUD)

These combine school with practical training and lead to skilled jobs (like electrician, carpenter, chef, hairdresser, etc.).

✓ Best for:

If you like hands-on work and want to enter the job market faster, or learn a trade.

3. Kombinerede forløb (EUX)

A mix of vocational training (EUD) and upper secondary academic courses. It gives you both a trade and the ability to go to university afterward.

✓ Best for:

If you want a job skill but also want the option of further education later.

My Advice (Based on You):

Since you're fluent in Danish, born and raised in Denmark, and likely familiar with the school system, you have the full range of options available.

Ask yourself:

- Do I enjoy school and theoretical learning?
 - Do I have a subject I'm passionate about (e.g., business, science, design, mechanics)?
 - Do I want to go to university?
 - Do I want to work sooner or prefer a longer education?
-

Suggested Next Steps:

1. **Talk to a school counselor (UU-vejleder)** – They can give you personalized advice and help you apply.
 2. **Try out “brobygning” (bridge-building weeks)** – You can test different educations before deciding.
 3. **Look at your interests** – If you like tech, HTX or a tech-focused EUX could be great. If you're into languages or society, maybe STX or HHX.
-

If you'd like, I can help you explore careers based on your interests — just tell me what you enjoy or what you're curious about (school subjects, hobbies, future dreams, etc.)!
