

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Montenegro. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a big step—well done on finishing primary school! Since you're in Denmark and just finished 9th or 10th grade, here are your main options going forward, depending on your interests and what kind of life you want:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 3-year programs that prepare you for university. Choose this if you're interested in continuing your education after high school.

Options:

- **STX (Studentereksamen):** Broad academic subjects, good for university.
- **HHX (Handelsskolen):** Business, marketing, economics – great if you're into business or entrepreneurship.
- **HTX (Teknisk Gymnasium):** Focus on tech, IT, biology, math – great if you like science, technology, or engineering.
- **HF (2-årig Højere Forberedelseseksamen):** Shorter (2 years), more practical, easier re-entry to education if you've had challenges.

✅ **Recommended if you're still figuring things out** and want to keep many doors open. If you're good at school and think you might want a university degree later, this is your path.

2. Erhvervsuddannelser (VET – Vocational Education and Training)

Learn a specific trade or profession while working. Takes about 2–4 years, depending on the job.

Examples:

- Carpenter
- Electrician
- Mechanic
- Hairdresser
- IT support

- Healthcare assistant

✓ **Recommended if you like practical work** and want to earn money earlier. You can always continue to higher education later via *EUX* or *Erhvervsakademi*.

3. **EUX – Hybrid Path**

This combines vocational training with a high school diploma, so you can both work *and* study further.

✓ **Recommended if you want a skill/job but also keep your academic options open.** A strong choice for ambitious, practical students.

BONUS: What Should You Choose?

Think about your personality and goals:

Question	If Yes...	Suggestion
Do you enjoy reading, writing, or analyzing?	Yes	STX or HF
Do you like business, money, or marketing?	Yes	HHX
Are you curious about tech, science, or design?	Yes	HTX
Do you like working with your hands or want a job quickly?	Yes	EUD (vocational)
Are you ambitious and practical?	Yes	EUX

Tips for Young Danes with Immigrant Backgrounds

- Don't feel pressured to choose "safe" jobs only. Many children of immigrants go into business, health, or trades early—but if you love science, art, or want to become a lawyer, go for it.
- You can always *switch programs*. Nothing is permanent at this stage.
- Use **Studievalg Danmark** or **UddannelsesGuiden.dk** to explore more options and get free advice.

If you tell me more about:

- What subjects you enjoy
- What you dream of doing (or what your parents hope you'll do 😊)
- Whether you want to work fast or study long

...I can give you a much more personal recommendation.
