

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Montenegro. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that—you're at a very important point in your life, and it's great that you're thinking ahead. Since you've just finished **primary school** (which in Denmark usually ends after 9th or 10th grade), your next step depends on your **interests, strengths**, and **career goals**.

Here's an overview of the most common educational paths in Denmark after primary school, followed by some guidance tailored to your situation:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university or other higher education. You usually apply around age 15-16.

Main types:

- **STX (Almen Studentereksamen):** Focus on a broad range of subjects – humanities, social sciences, natural sciences.
- **HHX (Højere Handelseksamen):** Business-oriented – great if you're into economics, marketing, or management.
- **HTX (Højere Teknisk Eksamen):** Focus on technology and science – good if you're into math, IT, or engineering.
- **HF (Højere Forberedelseseksamen):** Shorter (2-year), more flexible program – often chosen by those who want to enter specific professions like teaching or healthcare.

 **Best if:** You're academically oriented and want to go to university later.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This combines school and practical work (apprenticeship), leading to a skilled trade.

Examples:

- Electrician
- Carpenter
- Mechanic
- Hairdresser
- Health care assistant

👉 **Best if:** You prefer hands-on learning and want to start working earlier (though you can still study more later).

3. EUX – Hybrid Program

Combines vocational training **and** academic subjects, so you can both work in a trade **and** qualify for university.

👉 **Best if:** You want both options: practical skills + the ability to study further later.

How to Decide?

Ask yourself:

- Do I enjoy academic subjects like math, science, languages, or history?
- Am I more hands-on and prefer doing things over studying theory?
- Do I want to go to university someday?
- What kinds of jobs sound interesting to me?

🌟 Tailored Suggestions for You

As a 16-year-old fluent in Danish and with a multicultural background:

- If you're academically strong and curious about global issues, languages, or science, **STX** or **HHX** might suit you well. Your cultural background could also be an asset in studies like **international business, languages, or diplomacy**.
- If you're not sure what you want yet, but want to keep your options open, **HF** or **EUX** can be a smart move.
- If you enjoy working with your hands or want to enter the workforce earlier, but maybe still study later, **EUD** or **EUX** could work well.

✅ Next Steps

1. **Talk to a guidance counselor (Studievejleder)** at your school or local youth guidance center (UU).
2. **Visit open house events** at local gymnasiums and vocational schools.
3. Try **"Brobygning"** (bridging courses) where you visit different education paths to see what fits.

Would you like help finding nearby schools or programs in your area of Denmark? Or would you like to share more about what subjects or careers interest you? I can give more specific advice based on that.
