

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Morocco. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking about your future at this point. Since you're in Denmark and just finished primary school (folkeskolen), your next step typically depends on your interests, strengths, and long-term goals. I'll walk you through your main options, and suggest a few paths depending on what kind of person you are and what you might enjoy.

## Main Educational Options After Primary School in Denmark

### 1. **Gymnasiale uddannelser (Upper Secondary Education)**

These are usually 3-year programs that prepare you for university.

- **STX (Studentereksamen)** – Broad academic education (humanities, sciences, social sciences).
- **HHX (Højere Handelseksamen)** – Focuses on business, economics, and international studies.
- **HTX (Højere Teknisk Eksamen)** – More technical/science-oriented (good if you like engineering, IT, or design).
- **HF (Højere Forberedelseksamen)** – 2-year program, more flexible, good for students who want a shorter academic path before university.

#### **Choose this path if:**

You're interested in going to university or you want to keep your future options open.

### 2. **Erhvervsuddannelser (Vocational Education – EUD)**

Combines school and apprenticeship. Leads directly to a job, but can also lead to further education later (e.g., via EUX or voksenuddannelse).

- Examples: Electrician, carpenter, hairdresser, mechanic, chef, healthcare assistant, etc.

#### **Choose this path if:**

You like hands-on work, want to start working earlier, or already have a career field in mind.

### 3. **EUX (Vocational + Academic Hybrid)**

Combines EUD and gymnasiale subjects. You get both a vocational qualification and the right to go to university.

#### **Choose this if:**

You want both practical skills and the option to study more later.

## Based on What You've Said

- You're fluent in Danish (great!).
- You have a multicultural background — that can be a strength in many fields, like international business, diplomacy, healthcare, or education.

- You're 16 and have just finished primary school — so you're likely going into a youth education now.

## ? Questions to Help You Decide

Ask yourself:

1. Do I want to go to university someday?
  2. Do I enjoy working with my hands or solving practical problems?
  3. What school subjects do I like most? (Math, science, languages, business, etc.)
  4. Do I want to start earning money soon or study for longer first?
- 

## ☀ Sample Scenarios

### 👛 If you like business and people:

Go for **HHX** – strong if you're interested in entrepreneurship, marketing, or international trade.

### 🔬 If you're into science, tech, or design:

Try **HTX** – great for future engineers, IT specialists, or architects.

### 👷 If you want to work early and like practical tasks:

Consider **EUD** or **EUX** – e.g., electrician, auto mechanic, or chef.

### 🎓 If you're unsure and want to keep options open:

**STX** or **HF** are solid choices that don't lock you into a narrow field.

---

## 👣 What You Can Do Next

1. **Attend Open House events** at local schools.
  2. **Talk to an educational counselor (studievejleder)** – every kommune offers help for young people choosing their next step.
  3. **Try an internship (praktik)** or short work experience to test a field.
- 

If you tell me more about your interests (like favorite subjects or future dreams), I can give you more specific recommendations. Would you like help figuring that out?
