

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mozambique. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — and congratulations on finishing primary school! That's a big step. In Denmark, after primary school ("folkeskole"), you typically have a few options depending on your interests, academic strengths, and future goals. Since you're 16 and have just finished folkeskole, here are the main educational paths available, along with some personalized advice:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are good if you're academically strong and might want to go to university in the future.

- **STX (Studentereksamen)** – Focuses on humanities, sciences, and social studies.
- **HHX (Handelsskolens studentereksamen)** – Focuses on business, economics, and international trade.
- **HTX (Teknisk studentereksamen)** – Focuses on technology, natural sciences, and innovation.
- **HF (Højere Forberedelseseksamen)** – A 2-year program (instead of 3) with more flexible teaching, suitable if you want a more direct path to higher education but with less pressure.

● **Recommended if:** You enjoy school subjects, are considering university, and like academic learning.

🔧 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

These programs combine school with apprenticeship in a company (praktik).

Examples:

- Electrician, carpenter, chef, healthcare assistant, hairdresser, IT supporter, etc.

● **Recommended if:** You want to learn a practical skill and start working sooner. You can still pursue further education later (like *EUX*).

✅ **Tip:** Consider **EUX**, which combines vocational training with academic studies — so you can both work in a trade and have the option to go to university later.

🕒 3. 10. klasse (Optional extra year)

If you're unsure what to do, many students take 10th grade to mature a bit more and explore their interests. This can also be done in a **10. klassecenter** or at an **efterskole** (boarding school focused on personal development, often with arts, sports, or tech).

● **Recommended if:** You're not 100% sure what to study next, and want to grow socially, academically, or emotionally before choosing.

Considering Your Background

Since you're fluent in Danish and born in Denmark, you have the same opportunities as anyone else here — which is great! Your Mozambican background could also be a big strength, especially in fields like international business, language, global studies, or social work.

To Decide, Ask Yourself:

- Do I enjoy studying theory and reading? (If yes → STX, HHX, or HTX)
 - Do I like hands-on learning or working with my hands? (If yes → EUD or EUX)
 - Am I still figuring myself out and need more time? (If yes → 10. klasse or efterskole)
 - What are my dreams in 5–10 years?
-
