

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Namibia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thank you for sharing your background — and congratulations on finishing primary school! In Denmark, after primary school (folkeskole), you have several good options depending on your interests, strengths, and long-term goals. Here's a breakdown to help you decide what might fit you best:

1. Gymnasium (General Upper Secondary Education)

Best if you're interested in further academic education (e.g., university).

Options:

- **STX (Almen studentereksamen)** – Broad academic subjects (science, language, culture).
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, natural science, and innovation.
- **HF (Højere Forberedelseksamen)** – A more flexible, 2-year program for those who want a shorter route to higher education.

✓ Good if you enjoy school subjects

✓ Opens doors to university and professions like law, medicine, teaching, engineering, and more

⚠ More theoretical – not hands-on

2. Erhvervsuddannelse (Vocational Education and Training, EUD)

Best if you want to work soon or like practical skills and hands-on learning.

You can become:

- Electrician
- Carpenter
- Hairdresser
- Social and health care worker (SOSU)
- Chef, mechanic, IT supporter, etc.

✓ Earn money while learning (paid internships)

✓ Learn job-ready skills

⚠ More limited access to university (but still possible with **EUX** – see below)

3. EUX – A Combination of Vocational and Academic

Best if you want both practical skills and the option for university later.

- ✓ Earn a trade qualification + get the same level of education as STX
 - ✓ Great if you're not sure yet what path to follow
 - ⚠ Can be demanding because it combines two systems
-

🤔 What to Consider Before Choosing:

1. **What are you good at?** – Do you like hands-on work or academic subjects more?
 2. **What do you enjoy?** – Science, business, helping others, building things?
 3. **Do you want to go to university one day?** – Or do you want to start working sooner?
-

💬 My Suggestion (Based on Your Background):

Since you're fluent in Danish and you've just finished folkeskole, all doors are open to you.

If you're unsure about your long-term career plans but want to keep options open:

- **STX or HHX** is a safe bet if you enjoy learning and are open to university later.
- **EUX** is excellent if you want both practical and academic skills (especially if you're interested in something like IT, health, or business).

If you already know you want to work in a trade or profession:

- Go for **EUD** or **SOSU** with apprenticeship opportunities.
-

🌐 Tip:

Talk to a **UU-vejleder** (educational guidance counselor) — every kommune in Denmark has one. They can help you explore your interests and apply for youth education through **Optagelse.dk**.

If you tell me more about your interests (e.g., do you like working with people, technology, art, business?), I can help you narrow it down even more!
