

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nauru. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that. Since you've just finished **primary school** (Folkeskolen) in Denmark and you're considering your next step, here's a breakdown of your **options and recommendations**, depending on your interests, strengths, and goals.

First, a Few Questions to Consider:

To recommend the best path, think about:

- Do you enjoy **academic subjects**, or more **practical/hands-on** work?
- Are you aiming for **university** someday?
- Do you have any **career ideas** already? (like tech, health, business, trades, art?)
- How well did you do in **subjects like math, science, languages, or creative ones**?

Main Educational Paths After 9th/10th Grade in Denmark

1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're academically inclined or want to keep many doors open (including university), choose one of these:

- **STX (Studentereksamen)** – broad and academic, with options in science, language, or humanities.
- **HHX (Higher Commercial Exam)** – focuses on business, economics, and marketing.
- **HTX (Higher Technical Exam)** – focuses on technology, science, and innovation.
- **HF (Higher Prep Exam)** – shorter (2 years), often for those who want a faster path to further education.

 **Best for you if:** you're aiming for **university or higher education** and like academic work.

2. EUD / EUX (Vocational Education and Training)

If you prefer **practical learning** and want to get a job faster – but still keep the door open for more studies.

- **EUD** – Vocational training in things like electrician, carpenter, chef, mechanic, health care assistant, etc.

- **EUX** – Combines vocational training **and** academic subjects (you get both a trade and the option to study at university later).

✓ **Best for you if:** you want to **work with your hands, get into a trade**, or be job-ready quicker.

💡 My Suggestion for You:

Since you're **fluent in Danish, born and raised in Denmark**, and just finishing primary school, here's a **tiered recommendation** depending on your interests:

👛 If You Like Business or Entrepreneurship:

→ Go for **HHX** – strong foundation in economics, business, languages, and gives access to university.

🔧 If You Like Science or Technology:

→ **HTX** – great for students interested in IT, engineering, or science.

🧠 If You're Not Sure Yet:

→ **STX** is a solid all-around choice and keeps most doors open.

🔧 If You Prefer Practical Work:

→ **EUX** – you get a job qualification AND the option to study further. Great flexibility.

🎯 Final Tips

- Visit **open house events** (Åbent hus) at local schools.
 - Talk to your school's **educational counselor (UU-vejleder)** – they help students like you decide.
 - Try to do a **praktik (internship)** or **brobygning (bridge-building week)** at different schools to see what feels right.
-

If you tell me more about your **interests** or any careers you're thinking about, I can give a more personalized path for you. Want to try that?
