

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Netherlands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question — and an important decision. Since you've just finished **primary school in Denmark**, you're likely transitioning into **ungdomsuddannelse** (youth education), which typically includes **gymnasium**, **vocational education**, or other specialized options. Here's a breakdown of your main paths and some guidance to help you choose based on your interests and strengths:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic paths that prepare you for **university**.

Options:

- **STX (Alment gymnasium):** Broad education – good if you're interested in subjects like history, languages, sciences.
- **HHX (Handelsskole):** Focus on business, economics, and marketing – ideal if you're interested in commerce or entrepreneurship.
- **HTX (Teknisk gymnasium):** Focus on science, technology, and engineering – great if you like math, physics, or computers.
- **HF (Højere forberedelseseksamen):** A shorter and more flexible 2-year option – often chosen by those who want to go to uni but didn't take a traditional path.

Good if:

- You like studying academic subjects.
- You want to go to university.
- You're not sure what you want yet — gymnasiums keep doors open.

2. Erhvervsuddannelser (EUD) – Vocational Education and Training

This combines **school and apprenticeships**, leading to skilled jobs.

Examples:

- Electrician, carpenter, chef, hairdresser, mechanic, IT-support, etc.

Good if:

- You enjoy **practical, hands-on work**.
 - You want to **start working earlier** (or start earning money while learning).
 - You're not that interested in purely academic studies.
-

3. EUX – A Combination Path

EUX combines **vocational training with academic courses**, so you can both **work as a skilled professional** and **qualify for university**.

Good if:

- You like practical work but also want to keep the university option open.
 - You're motivated and organized – it's a demanding but very versatile path.
-

How to Choose?

Ask yourself:

1. Do I like **studying and reading**, or **doing and creating**?
 2. Do I want to go to **university**, or would I prefer **starting a career earlier**?
 3. Am I more interested in **science/tech, business, languages/culture**, or **practical skills**?
-

Bonus: International Background

You're fluent in Danish, and with Dutch parents, you may also know (or could easily learn) Dutch and English well. That's a **huge asset**. Consider:

- **STX with language focus** if you're into culture or global careers.
 - **HHX** if you're interested in international business.
 - Possibly look into **international programs** later (like IB – International Baccalaureate) if you want to study abroad.
-

Recommendation:

If you're not sure what you want yet and like studying, **STX** is a safe and flexible choice. If you're more drawn to business or practical skills, **HHX** or **EUX** could be better.
