

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Netherlands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and you're 16, you're at a key transition point in the Danish education system. Here's a breakdown of your main options and some guidance based on your situation:

Danish Education Options After Primary School (Folkeskolen)

1. Gymnasium (General Upper Secondary Education)

- **What it is:** A 3-year academic program preparing you for university.
- **Main types:**
 - **STX** (general subjects, focus on humanities, sciences or social sciences)
 - **HHX** (focus on business and economics)
 - **HTX** (focus on technical and scientific subjects)
 - **IB** (International Baccalaureate – in English, internationally recognized)
- **Good if you:** Are academically inclined and considering university.

Recommendation for you?

- If you're curious, ambitious, and enjoy school, **STX or IB** might be great choices.
- If you have an interest in international studies or want flexibility later (e.g., studying in Denmark or abroad), **IB** is worth considering – especially since you have Dutch roots and might study outside Denmark one day.

2. EUX (Vocational + Academic Program)

- **What it is:** Combines vocational training (like carpentry, IT, business, health) with academic classes, giving you both a trade and a pathway to university.
- **Good if you:** Want practical skills but also keep university as an option.

Recommendation?

- If you're hands-on, but still want future flexibility, **EUX** is a very strong path. It's popular with students who like learning by doing.

3. EUD (Vocational Education and Training)

- **What it is:** Focused entirely on preparing for a job (e.g., electrician, mechanic, chef, hairdresser).
- **Good if you:** Want to start working sooner, learn by doing, and have a clear interest in a trade.

4. Other options

- **Efterskole:** A 1-year residential school with both learning and life experience – many students do this between 9th and 10th grade.
- **10th grade:** Optional extra year to mature, improve grades, or decide on a path.
- **Private/International Schools:** Some international options may also exist near you, especially with your Dutch background.

Personal Considerations for You

You mentioned:

- You're fluent in Danish ✓
- You're born and raised in Denmark ✓
- Your parents are Dutch – so international thinking could be useful
- You just finished primary school – so this is your first big educational decision

Questions to ask yourself:

- Do I like studying theory (e.g., math, languages, history)?
- Do I prefer practical, hands-on work?
- Am I interested in going to university?
- Would I like to study or work abroad in the future?

Suggested Next Step for You

If you're still unsure, **consider this flexible path:**

1. **Start with STX or IB:** If you enjoy learning and want to keep all doors open.
2. If you're more practically inclined but want the option of higher education, **go for EUX.**
3. If you want time to explore, a **10th grade year** or **efterskole** can be a great in-between step.

If you want, I can help you:

- Compare STX vs IB
- Explore nearby schools
- Draft a plan based on your interests

Would you like to explore one of these options in more detail?
