

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from New Zealand. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question — and it's awesome that you're thinking seriously about your next steps. At 16 in Denmark, you're at a key transition point. Here are your main educational options, along with some tailored advice based on your background:

🎓 Main Educational Paths in Denmark After Primary School (Folkeskole):

1. Gymnasium (STX, HHX, HTX)

This is the academic path that prepares you for university. It takes 3 years.

- **STX** (Almen studentereksamen): General upper secondary school with focus on humanities, natural sciences, and social sciences.
 - Best if you want a broad academic education and possibly university later.
- **HHX** (Higher Commercial Examination Programme): Focus on business, economics, and marketing.
 - Ideal if you're interested in business or want to study at business school.
- **HTX** (Higher Technical Examination Programme): Focus on science, technology, and engineering.
 - Great if you're into tech, engineering, or science.

Recommendation: If you enjoy studying a variety of subjects and want to keep your university options open, **STX** or **HTX** could be great choices.

2. EUX / EUD – Vocational Education and Training

This combines practical work with education and can lead straight into a trade or profession. You can also take an **EUX**, which gives you both a trade certificate *and* access to higher education.

- **EUD**: Directly into a trade (carpenter, electrician, chef, etc.).
- **EUX**: Combines trade with academic subjects, keeping doors open for further education.

Recommendation: If you like hands-on learning and already have an interest in a particular profession, **EUX** is a strong option that keeps both job and university paths open.

3. International or IB (International Baccalaureate)

Given your New Zealand background and English skills, this might be a strong fit. IB is taught in English and recognized globally.

- **IB Diploma Programme (DP)** is offered at some schools in Denmark.
- Pre-IB year might be required first if you're coming from Folkeskole.

Recommendation: If you're interested in possibly studying abroad later or want an international environment, **IB** is a great option — especially with your background.

Based on Your Profile:

- **You're fluent in Danish** – so you can choose both Danish and international paths.
 - **You have an international background (New Zealand)** – so international education like IB could align well with your identity and open doors globally.
 - **You've finished Folkeskole at 16** – right on time to enter upper secondary education.
-

My Suggested Path:

1. **If you're academic and like a broad range of subjects:**
→ **STX** (or **IB** if you're interested in international education)
 2. **If you're interested in tech or science fields:**
→ **HTX**
 3. **If you prefer practical learning or want to get into a profession quickly, but keep options open:**
→ **EUX**
 4. **If you're thinking about university abroad (like in NZ or elsewhere):**
→ **IB Diploma Programme**
-

If you want, I can help you:

- Compare schools or programmes near where you live.
- Think through your interests and match them to study paths.
- Explore potential careers based on your personality or hobbies.

Just let me know!
