

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from New Zealand. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — being fluent in Danish and having roots in New Zealand gives you some interesting flexibility. Since you just finished **primary school** in Denmark at 16 (which likely means you've completed **9th or 10th grade in Folkeskole**, depending on your track), you're at a natural decision point. In Denmark, you now have a few main options. I'll outline them and suggest a path based on common goals — and you can tell me more about your interests for a more tailored suggestion.

Main Danish Educational Paths After Folkeskole

1. Gymnasiale Uddannelser (Academic Upper Secondary Education)

These are for you if you're considering university later on.

- **STX** (Studentereksamen): Broad, academic, and includes subjects like Danish, English, science, social studies, and arts. Great if you're not sure yet what you want to study.
- **HHX** (Business track): Focus on economics, business, and languages.
- **HTX** (Technical track): Focus on science, technology, and IT.
- **HF** (Shorter general exam): 2-year program, often for more mature or practical learners.

 **Recommended if:** You enjoy school, want to keep your university options open, or like academic subjects.

2. Erhvervsuddannelser (EUD) – Vocational Education and Training

Prepares you directly for a job or trade (e.g., electrician, chef, hairdresser).

 **Recommended if:** You like hands-on work, want to start earning sooner, or have a specific trade in mind.

3. Kombinationsforløb / Eux

This combines vocational education with an academic exam, letting you both learn a trade **and** qualify for university.

 **Recommended if:** You want the flexibility of working in a skilled trade **and** having the option to study later.

International Angle

Since your parents are from New Zealand, you might also consider:

- **International Baccalaureate (IB):** Taught in English, recognized worldwide, good if you're thinking of studying abroad.
 - Moving to NZ for high school (not common, but an option if family supports it).
-

My Recommendation (Based on What You Shared)

If you're not sure yet what you want long-term, and you're academically capable and want to keep doors open:

Go with STX or IB

- STX if you prefer the Danish system and want a good, general education.
 - IB if you're considering studying abroad (including NZ, UK, Netherlands) or want a more international environment.
-

Next Steps:

- Talk to a **UU-vejleder (youth education counselor)** — they can help you understand your local options.
 - Consider **bridge programs** or **intro courses** this summer if you're unsure.
 - Visit open house events for STX, HHX, HTX, etc.
-

Would you like help comparing STX vs IB specifically? Or do you have a particular career or subject interest (e.g., tech, medicine, arts)? That could narrow things down further.
