

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Niger. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — you're in an exciting moment in your life, and it's great that you're already thinking about your future.

Your Options After Primary School in Denmark

In Denmark, after **folkeskole (primary school)**, you typically have these main educational options:

1. Gymnasiale uddannelser (Upper Secondary Education – General Path)

These are academic programs that prepare you for university. There are different types:

- **STX (studentereksamen)** – Focus on humanities, natural sciences, and social sciences.
- **HHX** – Business-oriented.
- **HTX** – Technology and science-oriented.
- **HF** – A shorter 2-year general program, often more practical.

✓ **Recommended if:** You like academic subjects, might want to go to university, and enjoy learning in a classroom setting.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

This is a hands-on path where you combine school with work experience. You train for a specific job, like electrician, hairdresser, chef, mechanic, or healthcare assistant.

✓ **Recommended if:** You prefer practical, hands-on work and want to enter the job market quicker.

3. Kombinerede forløb / EGU / FGU (Preparatory Education)

For students who need a bit more support or want to prepare before going into VET or upper secondary. FGU (Forberedende Grunduddannelse) is common for those not fully ready for gymnasiale or vocational programs yet.

✓ **Recommended if:** You're not sure what to do next or need a bit more time or support.

How to Decide What's Best for You

Here are a few key questions to ask yourself:

- **What subjects do I enjoy most?**

- **Do I like studying, reading, and writing — or working with my hands and being active?**
- **Am I considering university in the future?**
- **Do I want to start earning money and working sooner?**

Some Suggestions Based on Your Background

Since you're fluent in Danish, born in Denmark, and just finished primary school, all educational doors are open to you. If you:

- **Enjoy school, reading, and want to keep doors open for university**, then **STX** or **HHX** could be a great fit. HHX might even connect with business or international ideas — interesting given your multicultural background.
- **Prefer practical work or learning by doing**, then a **VET program** might lead you directly into a job — and many VET graduates also start businesses or continue studying later.
- **Want a balance**, consider **HTX** if you're into tech/science or **HF** if you want a shorter academic route.

Next Steps

1. **Talk to your UU-vejleder (youth guidance counselor)** — They can help you explore programs in your area.
2. **Visit schools** during open house (åbent hus) events.
3. **Talk to others** who are already in those programs — real stories help a lot.

If you tell me what subjects or careers you're interested in, I can give you a more tailored recommendation. Want to explore that?
