

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Norway. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great and exciting point in your life — and Denmark gives you a lot of good options after primary school. Since you've just finished **Folkeskolen**, your next steps typically include one of the following types of education:

♦ 1. Gymnasial uddannelse (General Upper Secondary Education)

These are academic, high-school level programs that prepare you for university later on.

- **STX (Studentereksamen)** – broad academic program, includes sciences, humanities, and languages.
- **HHX (Højere Handelseksamen)** – focus on business, economics, and international studies.
- **HTX (Højere Teknisk Eksamen)** – focus on science, tech, and innovation.
- **HF (Højere Forberedelseksamen)** – shorter (2 years), more practical, often for those who didn't go the traditional route.

Recommended if:

- You're interested in university later on.
- You like academic subjects or want more time to decide your long-term path.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

You mix school and apprenticeship (praktik), and you learn a specific trade.

- Examples: carpenter, electrician, hairdresser, chef, etc.
- Can lead directly to a job, or further education (e.g., erhvervsakademi).

Recommended if:

- You enjoy hands-on learning.
- You want to start working earlier.
- You already have a strong interest in a specific trade or profession.

♦ 3. Kombineret forløb (EUX)

This is a hybrid between vocational training and academic education.

- You get both a **studentereksamen** (like STX) and a **faguddannelse** (like EUD).
- Takes a bit longer, but gives you flexibility: you can work *or* go to university.

Recommended if:

- You want both options open.
- You're ambitious and like both theory and practice.

♦ Some personal factors to consider:

- **Do you want to go to university?** → STX, HHX, HTX, HF, or EUX.
- **Do you want to work sooner and be more hands-on?** → EUD or EUX.
- **Are you interested in tech, science, or creative fields?** → HTX.
- **Are you more into languages, history, and society?** → STX.
- **Do you enjoy business or economics?** → HHX.

Bonus (Norwegian roots):

Because your parents are Norwegian, you might also consider:

- **Nordic opportunities** later, like studying in Norway.
- Keeping your Norwegian language skills up, if you speak it.
- Some cross-border options or programs might exist, especially in the Øresund Region.

My advice:

Since you're 16 and just finished Folkeskolen, I'd recommend visiting some "**åbent hus**" (**open house**) events at nearby **gymnasier** or **erhvervsskoler** to get a real feel for them. Also, **talk to an educational counselor (UU-vejleder)** – they're free and used to helping people your age.

If you tell me more about your interests (e.g., favorite subjects, career ideas, hobbies), I can give you a more specific recommendation.
