

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Norway. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking carefully about your next step! Since you've just finished primary school in Denmark (which typically means **9th or 10th grade**), you're now at a key decision point in the Danish education system.

Here are your **main options**, along with recommendations based on different interests or goals:

1. Gymnasium (STX, HHX, HTX) — Upper Secondary School

This is the most common path if you want to go to university later.

- **STX (Almen studentereksamen)** – Focuses on general education (humanities, sciences, social sciences).
 -  Good if you're unsure what to study yet or want broad options later.
- **HHX (Handelsskole)** – Focuses on business, economics, and languages.
 -  Great if you're interested in business, marketing, finance, or management.
- **HTX (Teknisk gymnasium)** – Focuses on science, technology, and innovation.
 -  Perfect if you're into tech, engineering, or IT.

Recommended if: You want a broad education and possibly a university degree in the future.

2. Erhvervsuddannelse (EUD) — Vocational Education

This path leads to skilled jobs like carpenter, electrician, mechanic, chef, hairdresser, etc.

- Often includes an apprenticeship in a real company.
- Takes about 3-4 years, depending on the track.

Recommended if: You enjoy working with your hands, want to earn money early, and prefer a practical education.

3. EUX — Both Vocational and Academic

A combination of vocational training and general education.

- You get both a skilled trade AND a diploma allowing university access.
- A bit more demanding, but gives you flexibility.

Recommended if: You want a skilled trade but also want to keep the door open for university later.

What to Consider When Choosing:

- Do you enjoy academic subjects (like math, science, languages)? → **Gymnasium**
 - Do you prefer doing things with your hands or being active? → **EUD or EUX**
 - Are you thinking of starting a business someday? → **HHX or EUX Business**
 - Interested in tech and design? → **HTX or relevant EUD/EUX**
 - Want to keep your options open? → **STX or EUX**
-

Bonus: Because you have Norwegian roots

You might:

- Be eligible for **study opportunities in Norway** in the future (university, exchange).
 - Have **Nordic language advantage** – making it easier to study or work across Scandinavia.
-

Final Tip:

Most schools offer **guidance counseling**, and you can also try out options via “**brobygning**” (**bridging programs**) or **intro courses**. I recommend trying these if you're unsure.

If you tell me more about your **interests, strengths, or career ideas**, I can give you more specific advice.
