

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Oman. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting step — and Denmark offers several great options for post-primary education. Since you've finished primary school (folkeskolen), you're likely looking at what to do after 9th or 10th grade. Here's a breakdown of your main options and what might fit best depending on your interests:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are 3-year academic programs that prepare you for university.

Main options:

- **STX** (Alment gymnasium) – Broadest academic program with subjects like science, languages, social sciences, and humanities.
- **HHX** – Focuses on business, economics, and international trade.
- **HTX** – Technical and science-focused education (great if you like technology, biology, chemistry, etc.).
- **HF** – 2-year program, more compact and often used by older students or those wanting faster entry to university.

✓ Choose this if:

- You enjoy school and theoretical subjects.
- You might want to go to university.
- You like subjects like math, science, languages, business, or social science.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This combines school and practical work with apprenticeships, typically 3-5 years.

Tracks include:

- Health and care
- Technology and IT
- Cooking/hospitality
- Electrician, plumber, mechanic, etc.

✓ Choose this if:

- You enjoy hands-on learning.
- You want to work sooner and earn while you learn.
- You're more practical than theoretical.

💡 Denmark has a strong vocational system — many people find good jobs through this path.

♦ 3. Kombineret ungdomsuddannelse (KUU) / FGU (Forberedende Grunduddannelse)

If you're not sure what to do yet, or need a bit more preparation before starting a full-time education, the **FGU** is a flexible program to help build skills and confidence.

✅ Choose this if:

- You're unsure or need more time to explore your strengths.
- You want to build up basic academic or personal skills.
- You didn't pass all final exams from folkeskole (e.g., Danish or math).

♦ So, what should *you* choose?

Ask yourself:

- Do I enjoy academic subjects like Danish, math, history?
- Do I want to go to university one day?
- Or do I prefer doing things with my hands, learning by working?

If you're unsure, here's a **general recommendation**:

- If you enjoy learning and might want to go to university later: **STX** or **HHX**.
- If you like practical work or want to earn money sooner: **EUD**.
- If you're unsure or didn't feel confident in school: **FGU** could be a good stepping stone.

Would you like help choosing between specific programs (e.g. STX vs. HHX), or ideas for careers based on your interests?
