

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Oman. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and you're 16, you're at the stage where you typically choose between several upper secondary education paths. Your choice should depend on your interests, strengths, and future goals.

Here's a breakdown of your options in Denmark and how to think about them:

Main Educational Paths After Primary School (Folkeskole)

1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for university.

- **STX (Studentereksamen)** – Broad, academic focus (humanities, natural sciences, social sciences).
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination Programme)** – Focus on science, technology, and engineering.
- **HF (Higher Preparatory Examination Programme)** – Shorter (2 years), more practical – good if you're unsure or want to keep options open.

✓ Best if you're:

- Interested in academic subjects.
- Considering university later on.
- Not quite sure what you want to do but want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These lead directly to a skilled job, but can also be combined with further study.

Examples: Electrician, Carpenter, Hairdresser, Healthcare Assistant, IT Supporter.

✓ Best if you're:

- More interested in hands-on learning.
- Wanting to work sooner.
- Possibly considering becoming self-employed or combining work with further education later (like EUX).

3. EUX – A mix of vocational and general education

You get both a vocational qualification and access to higher education.

✓ Great if you:

- Want a trade but also want the option to go to university.
- Like both practical and academic learning.

Some Things to Consider:

- **Your interests:** Are you more into science, business, tech, helping people, or something creative?
- **Your strengths:** Do you prefer practical, hands-on tasks or reading and writing?
- **Long-term goals:** Do you see yourself going to university? Starting a job sooner?
- **Language & culture:** You're fluent in Danish, which is great. If you're also strong in English or Arabic, those skills could help in international business, diplomacy, or translation.

Example Pathways

- **Want to be an engineer or doctor?** → Go for **STX** or **HTX**.
- **Interested in business or international trade?** → **HHX** could be perfect.
- **Want to become a programmer or electrician?** → Try **EUD** or **EUX** with a tech focus.
- **Not 100% sure yet?** → **HF** is a solid, flexible path.

Final Advice

You don't need to have your entire future figured out now. Focus on choosing the path that feels most interesting **right now**. You can always change direction later—Denmark's system is flexible.

If you want, I can help you narrow it down further based on your interests. What subjects do you like? Any careers you've thought about?
