

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Pakistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot in giving you a good recommendation.

At 16 in Denmark, you're at an important crossroads in your education. Since you've just finished primary school (Folkeskole), your next step depends on your interests, strengths, and future goals. Here are your main options and how to choose between them:

1. Gymnasium (STX, HHX, HTX, HF)

These are general or specialized upper secondary education paths. They're great if you're interested in going to university later.

- **STX (Studentereksamen):** Focuses on general academic subjects like languages, science, and humanities. Good if you're unsure or want broad options.
- **HHX (Handelsskole):** Business and economics-focused. Great if you're into business, marketing, or finance.
- **HTX (Teknisk gymnasium):** Science, technology, and engineering focus. Ideal for tech- or science-minded students.
- **HF (Højere Forberedelseksamen):** Shorter (2 years), more flexible, often for those who didn't take 10th grade or prefer a more practical academic path.

✓ Good choice if:

- You enjoy studying
- You might want to go to university
- You want to keep your options open

2. Erhvervsuddannelse (VET – Vocational Education and Training)

A practical education where you learn a trade and start working early. You can become a craftsman, chef, hairdresser, mechanic, IT supporter, or even work in health care.

✓ Good choice if:

- You like working with your hands or learning by doing
- You want to get a job sooner
- You're not interested in university (but note: you **can** go to higher education later with *EUX*)

🔧 **EUX** combines vocational training with academic studies, giving you both a trade and the option to go to university later. Very flexible and smart if you want both options.

3. 10th Grade (10. klasse)

This is an optional year where you can get more mature, explore your interests, and prepare better for upper secondary education.

✅ Good choice if:

- You feel unsure about your next step
 - You want to improve your grades or maturity before Gymnasium or VET
 - You want time to explore what suits you
-

How to Decide?

Ask yourself:

- Do I like academic subjects and want to keep studying? → **Gymnasium**
 - Do I prefer practical work or want to start earning earlier? → **VET or EUX**
 - Do I need more time to figure things out? → **10th grade**
-

Tip for You Personally

Since you're fluent in Danish, were born here, and have a multicultural background, you have a strong position. You might be interested in careers where cultural understanding is an advantage — like **international business, teaching, healthcare, or IT**.

If you're not 100% sure what you want yet, doing **10th grade** while exploring options (internships, open house events at schools, talking to a vejleder) could be very smart.

Would you like help exploring careers that match your interests? I can guide you through that too.
