

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Pakistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that's really helpful context. Since you're 16, fluent in Danish, and just finished primary school in Denmark (likely meaning **folkeskole** up to 9th or 10th grade), you're at a common decision point for students in Denmark.

Here are your main **educational path options** and how they might fit you, depending on your interests, strengths, and goals:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

If you're interested in university later on.

- **STX (Studentereksamen)**: Broad and academic, with focus areas like science, languages, or social sciences.
- **HHX (Højere Handelseksamen)**: Focus on business, economics, marketing, and international trade.
- **HTX (Højere Teknisk Eksamen)**: Focus on technology, science, and innovation.
- **HF (Højere Forberedelseseksamen)**: 2-year program, more flexible and practical — good if you want a quicker path to higher education.

Best for you if:

You enjoy academic subjects and might want to go to university (e.g., become a doctor, teacher, engineer, or psychologist).

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you want to **work sooner** or learn a trade.

You learn both in school and at a workplace (praktik). Includes fields like:

- Electrician
- Carpenter
- Hairdresser
- Health care assistant
- IT supporter
- Mechanic

- Chef

Best for you if:

You like practical, hands-on work and want to start earning earlier. You can always take extra courses later if you want to apply to higher education.

Things to consider:

- Are you more **academic or practical**?
 - Do you have a strong interest in something already — **IT, business, health, science, arts**?
 - Would you prefer working **sooner** or studying **longer**?
 - Do you want to help your family financially sooner, or focus on long-term goals?
-

Example paths:

- Want to become a **doctor** → STX or HF with science focus → university (medicine).
 - Interested in **business** → HHX → business school or work.
 - Like **tech and hands-on work** → HTX or EUD in IT → job or higher education.
 - Want to become a **mechanic or chef** → EUD → work directly.
 - Not sure yet? → STX or HF gives you time to explore.
-

Bonus tips (since you're bicultural):

- Bilingual and multicultural students like you often do really well in **global studies, languages, international business, or healthcare** — fields that need people who understand multiple cultures.
-

Final advice:

Pick a path that keeps **your options open** if you're unsure. Talk to a **studievejleder (study counselor)** at your school — they're very helpful and used to helping students in your exact position.

Would you like help narrowing it down based on your interests or strengths?
