

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Palau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's awesome that you're thinking seriously about your next steps. Since you just finished primary school (in Denmark that typically means after 9th grade), you have several good options. Let's walk through them together.

🎓 Common Educational Paths After Primary School in Denmark:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are for students who want to continue to university. You can choose from:

- **STX (Alment gymnasium)** – General upper secondary education, wide range of subjects.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere Forberedelseksamen)** – 2-year program, more practical and for those who may not want a full 3-year gymnasium.

✅ Good for you if:

You enjoy school, want more academic learning, and are considering going to university later.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and apprenticeships. You train to become a skilled worker (like carpenter, hairdresser, IT-supporter, mechanic, etc.).

✅ Good for you if:

You like practical, hands-on work, want to earn money while you learn, and want a clear path to a job.

3. Kombineret Forløb / EUX

This combines vocational training with academic classes so you can both learn a trade **and** qualify for university.

✅ Good for you if:

You want to keep your options open — maybe start working, but still be able to study later.

📌 How to Decide?

Ask yourself:

- Do I want to go to university one day?
 - Do I prefer academic learning or practical hands-on work?
 - What are my interests right now (e.g., technology, business, helping people, design)?
-

Your Background from Palau

Your cultural background is a strength! If you're bilingual (or even just multicultural), you could explore paths where communication, culture, or international work are useful — like:

- **HHX** if you're interested in international trade/business.
 - **STX** or **HF** if you enjoy language, culture, or social sciences.
-

Personal Advice

Since you're still young and just finished primary school, I'd recommend:

- Visiting **uddannelsesguiden.dk** (the official Danish education guide).
- Speaking to a **UU-vejleder** (educational guidance counselor). Every municipality in Denmark offers this.

If you're still unsure, **10th grade (10. klasse)** could also be a good transition year — especially if you want more time to figure things out.

Would you like help exploring specific programs near where you live in Denmark? Or do you want suggestions based on your hobbies or dream jobs?
