

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Paraguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—that gives helpful context! Since you just finished **primary school** in Denmark (which typically ends at 9th or 10th grade depending on your track), your next step usually falls into one of a few broad categories. Here's a quick breakdown of your main options and some advice to help you choose the right one based on your interests and goals:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic high schools that prepare you for university.

Options:

- **STX** (Almen studentereksamen): Broad and academic – good if you're not sure what you want to study yet.
- **HHX** (Handelsgymnasium): Focus on business, marketing, and economics.
- **HTX** (Teknisk gymnasium): Focus on science, technology, and engineering.
- **HF** (Højere Forberedelseseksamen): Shorter (2 years), often for those who want a more practical route to higher education.

Best for you if:

- You enjoy school and want to study at a university or higher education institution later.
- You're still exploring different interests.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These prepare you directly for a job (but can also lead to further education).

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- IT supporter

- Healthcare assistant

Best for you if:

- You want to start working in a trade or profession soon.
- You prefer hands-on, practical learning rather than sitting in a classroom all day.

3. Combination Routes

- **EUX:** Combines vocational training with a general upper secondary education – so you can both get a job and access higher education.
 - Good if you want the **flexibility** to keep your options open.

Special Considerations for You

Since you're fluent in Danish and were born and raised in Denmark, you have the same options as any Danish citizen. But your Paraguayan background is a **great advantage** too! Here's how:

- **Language + Culture:** If you speak Spanish, you have a strong asset in international business, tourism, diplomacy, translation, or education.
- **Multicultural Perspective:** Could be valuable in social work, education, or international studies.

? How to Decide

Ask yourself:

- Do I prefer **academic subjects** or **practical work**?
- Am I interested in **technology, health, business, design, or something else**?
- Do I want to **go to university** later?

A Strong, Flexible Recommendation:

EUX is a great middle path if you're unsure. It gives you a **vocational skill** plus access to **higher education**. You can keep your doors open while gaining something practical.

Want Help Narrowing It Down?

If you tell me:

- What school subjects you like
- What hobbies or interests you have
- Whether you like working with people, computers, tools, etc.

...I can help you choose a more specific path!
