

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Paraguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's a great place to start! Since you're 16 and just finished primary school in Denmark (which typically includes up to 9th or 10th grade), you're likely now deciding between different upper secondary education options. In Denmark, you have several good paths depending on your interests, strengths, and future goals. Here's an overview with tailored advice:

🎓 Main Education Paths After Primary School in Denmark:

1. STX – General Upper Secondary School (Gymnasium)

- **Focus:** Broad academic education (sciences, humanities, languages).
- **Good for:** Students who might want to go to university but aren't sure what to study yet.
- **Length:** 3 years.
- **Leads to:** University (any type).
- **Recommendation:** Great if you're interested in general knowledge and want to keep many options open.

2. HHX – Higher Commercial Examination Programme

- **Focus:** Business, economics, marketing, international trade.
- **Good for:** Entrepreneurial or business-minded students.
- **Length:** 3 years.
- **Leads to:** Business-related university programs or jobs.
- **Recommendation:** Worth considering if you're interested in international business, especially with your multicultural background (Danish + Paraguayan!).

3. HTX – Higher Technical Examination Programme

- **Focus:** Science, technology, engineering, IT.
- **Good for:** Students who enjoy math, science, or technology.
- **Length:** 3 years.
- **Leads to:** Engineering, IT, science studies.
- **Recommendation:** Consider this if you're into practical or tech subjects.

4. EUX – Combined Vocational and Academic Programme

- **Focus:** Mix of a vocational education (hands-on trade) and upper secondary (academic) education.
- **Good for:** Students who want both practical skills and access to higher education.
- **Length:** 4–5 years.
- **Leads to:** Skilled jobs *and* university (though more limited options).
- **Recommendation:** Very flexible path. Ideal if you want to learn a trade *and* keep studying later.

5. EUD – Vocational Education and Training

- **Focus:** Learning a specific trade (e.g., carpenter, chef, hairdresser, mechanic).
- **Good for:** Students who prefer hands-on work and want to start a career sooner.
- **Length:** 2–4 years.
- **Leads to:** Direct employment or further vocational training.
- **Recommendation:** A solid choice if university isn't your thing and you want a profession.

Personal Fit Questions to Ask Yourself:

- Do I like academic subjects like history, biology, math, or languages? → Consider **STX**, **HHX**, or **HTX**.
- Am I more hands-on or practical, and want to start working sooner? → Consider **EUD** or **EUX**.
- Do I want to run a business one day or work internationally? → **HHX** might be perfect.
- Do I enjoy building things, using tools, or working with technology? → **HTX** or **EUX** with a technical trade.
- Am I unsure? → **STX** keeps the most doors open.

Bonus: Your Multicultural Background

Your Danish-Paraguayan identity could be a big advantage in areas like:

- International business (language, culture, global markets)
- Language studies (maybe Spanish as a subject?)
- Social sciences or intercultural communication
- NGO or humanitarian work (especially with Latin America ties)

Next Steps

1. **Visit educational fairs** (uddannelsesmesse) or local youth education centers (UU-vejledning).
2. **Try “Brobygning” programs** – short trial programs where you experience different education types.

3. **Talk to a UU-vejleder** (Youth Guidance Counselor). They can give personal, free advice.

4. **Ask yourself honestly:** What am I curious about? What do I enjoy doing in school or free time?

If you tell me more about:

- What school subjects you enjoy most
- If you like working with your hands, people, or computers
- Whether you want to study more or work sooner

...I can give a more specific recommendation.
