

Uddannelsesmuligheder efter Folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Philippines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great point in your life to reflect and make smart choices! Since you're 16 and just finished primary school in Denmark (which likely means you've completed **Folkeskole**, including 9th or 10th grade), your next steps depend on your **interests**, **goals**, and **learning style**. Here's a breakdown of the main paths available in Denmark and who they suit best:

Main Educational Paths After Folkeskole in Denmark

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academically oriented and lead to higher education (like university):

a. STX (Almen studentereksamen)

- Focus: Broad academic subjects (science, languages, humanities, etc.)
- Good if: You want to keep your options open for university.

b. HTX (Teknisk studentereksamen)

- Focus: Science, technology, and engineering
- Good if: You enjoy math, science, or technology.

c. HHX (Højere handelseksamen)

- Focus: Business, economics, marketing
- Good if: You're interested in business or entrepreneurship.

d. HF (Højere forberedelseksamen)

- Focus: More practical, shorter (2 years), often used as a second chance or for more mature students.
- Good if: You want to get to higher education without the full 3 years of STX/HTX/HHX.

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

- Focus: Combines school with apprenticeship in a company (praktik)

- Leads to: A specific profession like electrician, carpenter, hairdresser, chef, etc.
- Good if: You prefer practical work and want to enter the job market earlier.

There's also **EUX**, which combines vocational training with a more academic education – so you can both get a trade and qualify for higher education.

Questions to Ask Yourself

Here are a few helpful questions to narrow down your path:

- Do I enjoy academic subjects and want to go to university later?
 - Do I prefer hands-on learning and starting to work earlier?
 - Am I interested in science/tech, business, healthcare, or something else?
 - Do I want to explore my Filipino background or consider international options too?
-

My Recommendation (Based on What You've Shared)

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school:

- **If you're unsure what you want yet:** STX is a safe and flexible path. You'll study a wide range of subjects and keep your options open.
 - **If you like technology or science:** HTX can be an exciting and modern choice.
 - **If you're into business or finance:** HHX is a great fit, especially if you dream of entrepreneurship or working internationally (maybe even with ties to the Philippines).
 - **If you want to learn a profession and start working early:** EUD or EUX could be ideal, especially if you enjoy learning by doing.
-

Bonus Tip: Consider Your Cultural Background

Your Filipino heritage can be a strength – maybe in international business, language skills, healthcare (many Filipinos work in this field), or global studies. If you're interested, you could look into **exchange programs, Filipino-Danish youth communities**, or even studying abroad later on.

If you tell me more about what you enjoy (subjects, hobbies, dreams), I can give a more personal suggestion!
