

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Philippines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting step – congratulations on finishing primary school! In Denmark, you have a few different educational options after primary (folkeskole), depending on your interests, strengths, and future goals. Here's a breakdown of your main options and what might suit you:

1. Gymnasiale uddannelser (Upper Secondary Education – for academic paths)

These are ideal if you're considering university in the future.

- **STX (Studentereksamen):**
 - Focuses on general academic subjects like languages, science, and humanities.
 - Good if you're not sure exactly what you want to do yet.
- **HHX (Higher Commercial Examination Programme):**
 - Focuses on business, economics, and international relations.
 - Ideal if you're interested in business, finance, marketing, or entrepreneurship.
- **HTX (Higher Technical Examination Programme):**
 - Focus on science, technology, and innovation.
 - Great for future engineers, IT specialists, or those into science/tech.
- **HF (Higher Preparatory Examination):**
 - A shorter (2-year) and more flexible academic path.
 - Good if you want a university option but a more practical or faster route.

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

If you like hands-on learning and want to enter the job market sooner, this is a strong choice.

- Includes trades like carpentry, electrician, hairdresser, healthcare assistant, IT support, chef, etc.
- Some programs combine school and paid internships (praktik).
- You can still pursue further education later through **EUX** (see below).

3. EUX (Combination of Academic and Vocational Path)

- Combines vocational training with subjects at the same level as gymnasium.

- Great if you want both practical skills **and** the option for university later.
 - More demanding but opens many doors.
-

How to choose?

Ask yourself:

- **Do I enjoy school and academic subjects?** → Consider STX, HHX, or HTX.
 - **Am I more practical and like working with my hands or solving real-world problems?** → EUD or EUX might be better.
 - **Do I want to go to university someday?** → STX, HHX, HTX, HF, or EUX.
 - **Do I want to work sooner and maybe study later?** → EUD or EUX.
-

Personal factors:

- Since you're fluent in Danish and have grown up here, you'll have full access to all Danish educational options.
 - If you also speak Filipino/Tagalog or English well, that could be a strength in international programs or business studies.
-

Recommendation based on your background:

Since you're 16, just finished primary school, and are fluent in Danish:

- If you enjoy learning and want to keep your options open: **STX or HHX** is a great choice.
 - If you're interested in technology or science: **HTX** might be the best fit.
 - If you want to learn a trade but still keep a university option: **EUX** is a strong, flexible path.
 - If you're unsure and want time to decide: **10th grade (10. klasse)** is also an option to give you time to explore.
-

Would you like help thinking through your interests or strengths more specifically? I can also help you look at what's available in your area of Denmark if you'd like.
