

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Poland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking seriously about your next steps! In Denmark, after finishing **primary school (folkeskole)** around age 16, you typically have a few main options depending on your interests, goals, and how you like to learn. Here's a breakdown to help you figure out what might suit you best:

1. Gymnasium (General Upper Secondary Education)

This is a **3-year academic program** that prepares you for university.

Best if you:

- Like school subjects like Danish, English, math, history, science.
- Might want to go to university later.
- Enjoy a mix of humanities, sciences, and social studies.

Types of Gymnasium:

- **STX**: General gymnasium with broad subjects.
- **HHX**: Business-oriented (good if you like economics, marketing).
- **HTX**: Technology-oriented (great for science, tech, IT).
- **HF**: A 2-year alternative, more practical and often for students who didn't follow the regular gymnasium path.

2. Erhvervsuddannelse (Vocational Education and Training, VET/EUD)

This is a **practical and career-focused path**, combining school and apprenticeship.

Best if you:

- Prefer hands-on learning.
- Want to become a skilled worker (e.g. electrician, carpenter, chef, hairdresser, mechanic).
- Want to start working earlier (you can still take extra steps later to go to university if needed).

There are many **specializations**, and you can always build on this education later.

3. EUX – A Mix of Gymnasium and Vocational Training

This combines VET and gymnasium. You get a **skilled trade qualification and a diploma that allows university admission.**

Best if you:

- Want both hands-on skills **and** the option to go to university.
 - Are hardworking and motivated – it's quite demanding but opens many doors.
-

 Bonus: Using Your Polish Background

Being bilingual and bicultural is a big strength! If you're interested in international work, translation, EU jobs, or global business, consider:

- Language studies.
 - International business (HHX).
 - Diplomatic studies (via STX → university).
-

 My Recommendation (based on what you shared)

Since you're fluent in Danish, born in Denmark, and just finished primary school, I suggest you ask yourself:

- Do you enjoy academic subjects and want to keep the door open to university? → **STX or HHX**
 - Do you prefer hands-on work or know a trade you'd like to pursue? → **EUD or EUX**
 - Not sure yet? → **STX is safest** if you want time to decide, and it's respected in most future paths.
-

Would you like help comparing STX, HHX, and HTX? Or exploring possible career paths linked to your interests? Let me know what subjects or activities you enjoy most, and I can personalize this even more!
