

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Poland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's a great starting point for figuring out what your next step could be. Since you just finished primary school in Denmark (so you're around the end of **9th or 10th grade**), you now have a few main educational paths to choose from. Here's a breakdown with some advice to help guide you, depending on your interests, strengths, and long-term goals:

Main Educational Paths in Denmark After Primary School

1. Gymnasiale Uddannelser (General Upper Secondary Education)

This path prepares you for university and higher education.

- **STX** (*Studentereksamen*): Broad academic education. Focuses on humanities, social sciences, and natural sciences.
- **HHX** (*Higher Commercial Examination*): Focus on business, economics, and marketing. Great if you're into business or want to be an entrepreneur.
- **HTX** (*Higher Technical Examination*): Focus on science and technology. Ideal if you're into engineering, tech, or science.
- **HF** (*Higher Preparatory Examination*): Shorter (2 years). More flexible, often used if you want to go into specific professions or need a fresh start.

Recommended if: You enjoy academic subjects, want to keep your options open for university, or are still unsure of your long-term career.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

A more hands-on, job-oriented path.

- Learn a trade or skill, like electrician, carpenter, chef, hairdresser, IT support, or healthcare worker.
- Includes practical work (apprenticeship) and school.

Recommended if: You prefer learning by doing, want to start working sooner, or are interested in specific professions.

Your Polish Background – A Strength

Being fluent in Danish and having Polish heritage can be a real advantage:

Printed using [ChatGPT to PDF](#), powered by PDFCrowd [HTML to PDF API](#).

- Consider careers in **translation, international business, or diplomacy**.
- You might even explore programs with **international focus** (e.g. IB – International Baccalaureate) if you're considering studying abroad later.

Questions to Help You Decide

1. Do you enjoy school and academic subjects? → Consider **STX, HTX, or HHX**.
2. Are you more practical and like working with your hands or in real-world settings? → Consider **EUD**.
3. Are you already interested in a career area (like healthcare, IT, design, etc.)? → Match it to a specific program.
4. Are you thinking about going to university someday? → Then **gymnasiale uddannelser** are better.

✨ Example Paths Based on Interests

Interest	Recommended Path
Tech / Engineering	HTX
Business / Economics	HHX
Humanities / Languages	STX or IB
Healthcare / Social work	EUD (social og sundhedsuddannelse), or HF
IT / Computers	HTX or EUD (IT-supporter or data technician)
Art / Design	EUD with creative focus, or STX with art electives

Final Advice

- Talk to a **UUV-vejleder** (youth education counselor) – they can give you personalized guidance.
- Visit **open house days** at local schools (gymnasiums or vocational schools).
- You don't have to have your life figured out now – choose a path that keeps you motivated and leaves options open.

If you tell me more about what subjects or hobbies you enjoy, I can give you even more specific advice.
